YOUR BUSINESS, CLEARLY ORGANISED

One friendly dashboard. Everyday control.

Business Suite brings planning, customers, sales, payments, work, stock and reports into one connected workspace - so the next action is always visible.

- Basic to Advanced
- Works offline
- Mobile friendly
- 3-day free trial

01

See today at a glance

Cash position, sales, expenses, pending amounts and recent activity.

02

Keep customers moving

CRM, leads, follow-ups, quotations, invoices and payment status.

03

Stay ahead of work

Tasks, calendar, orders, due dates, reminders and delivery progress.

04

Make better decisions

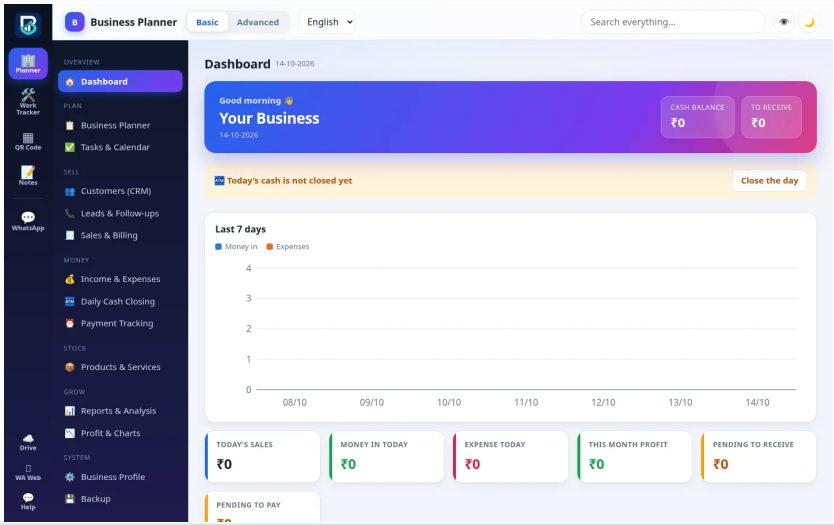

Reports, charts, stock signals and searchable records in one place.

FROM PLAN TO PAYMENT

Plan. Deliver. Get paid.

Start with a goal or enquiry, organise the work, record the sale, follow the payment and review the result - without rebuilding the same information in separate files.

Business Planner

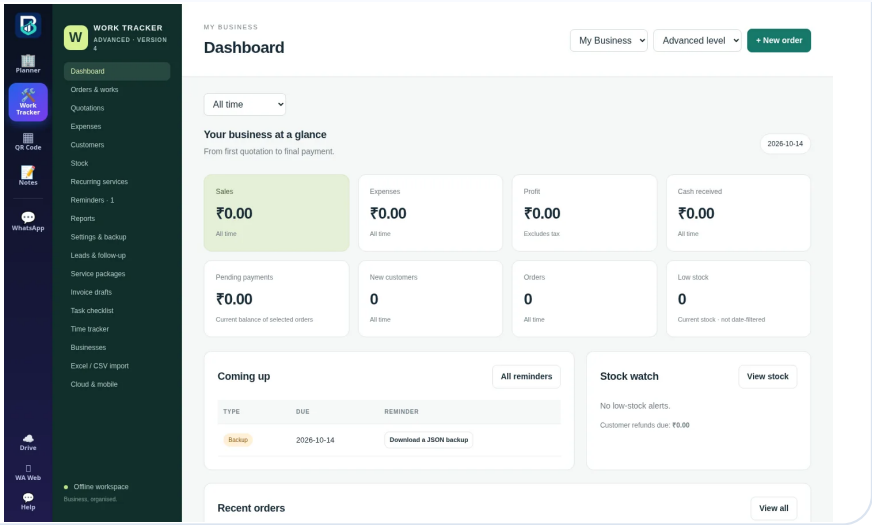

Plan & manage

CRM, leads, sales, money, stock and reports.

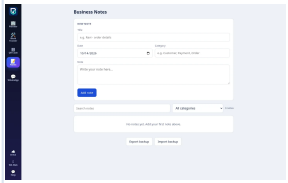

SHARED BUSINESS CONTEXT

Work Tracker

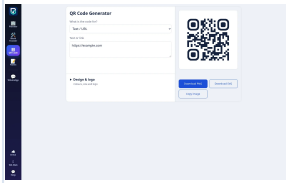

Deliver & follow up

Orders, quotations, costs, reminders and status.

Notes that stay useful

Capture customer, payment and order notes with dates, categories and fast search.

Branded QR codes

Create codes for links, contact details and payments; download PNG or SVG.

Built for everyday use

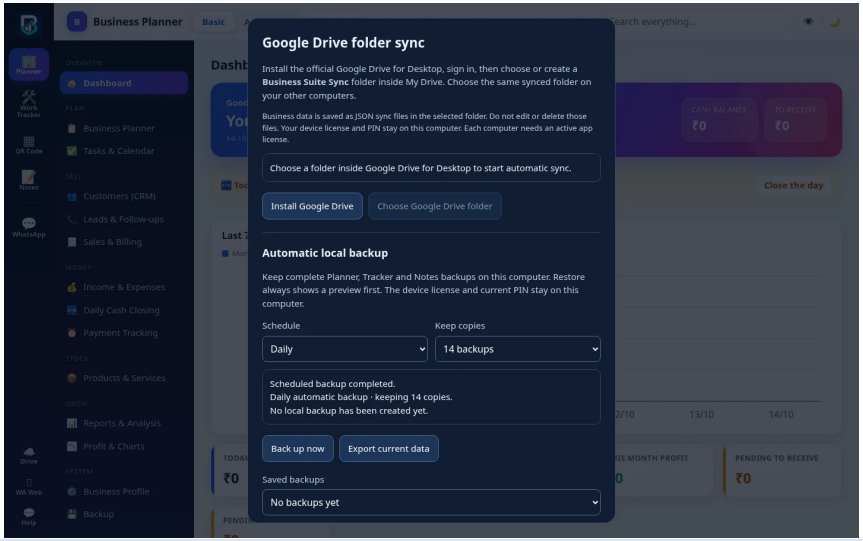

- + Global currencies
- + PDF & CSV export
- + Search everything
- + Responsive screens
- + Daily summaries
- + Basic/Advanced views

YOUR RECORDS, UNDER YOUR CONTROL

Work locally. Back up confidently.

Core records stay on the device. Optional Google Drive sync and scheduled local backups help keep the business moving across supported devices.

Drive, backup & restore

YOUR DRIVE

Your own Google Drive

Connect the account you choose. Business Suite uses the limited drive.file permission for files created or opened through the app.

BACKUP

Daily backup & restore

Keep scheduled local copies, export a backup when needed, check integrity and preview before restoring.

PRIVACY

Practical privacy

Business records are not sent to the licence server. Licence checks use account details, an anonymous installation ID and storage/count totals.
