Business Suite

Complete Customer Guide

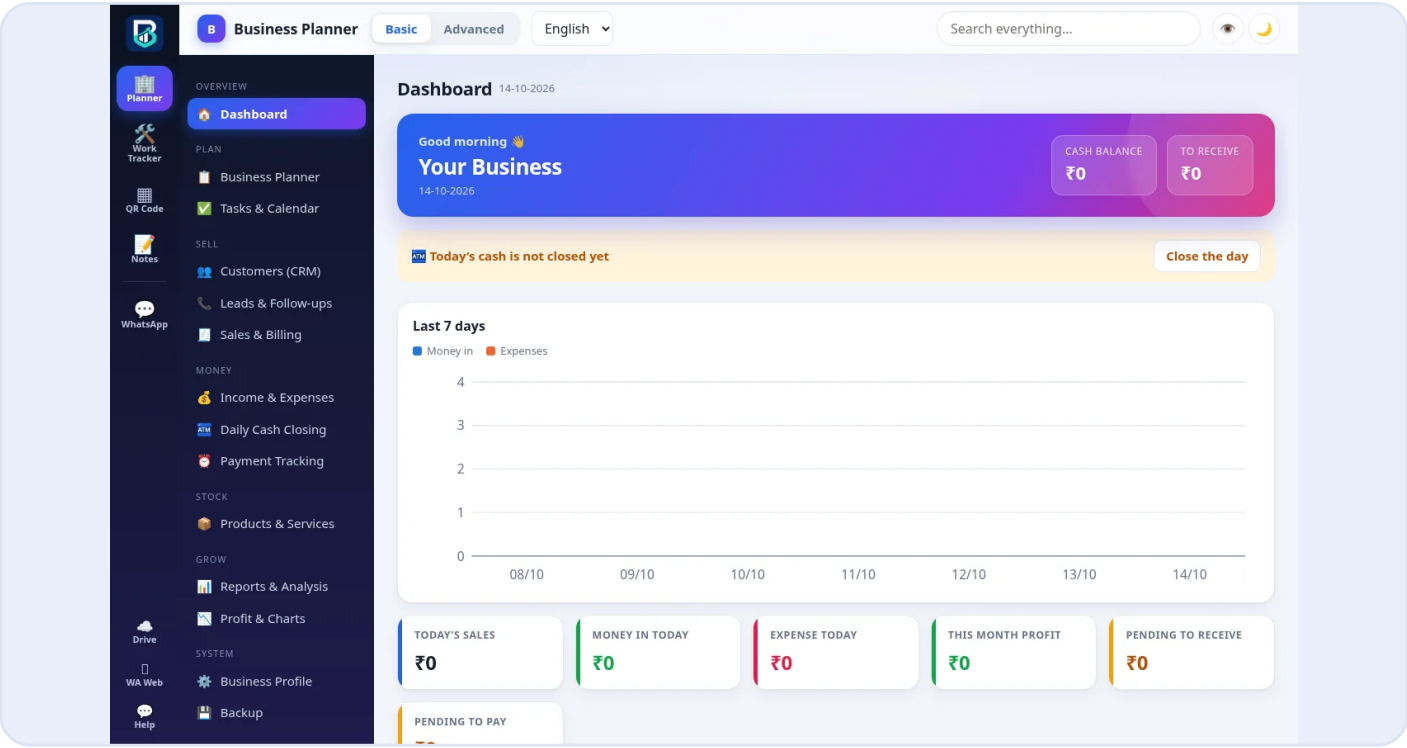

A complete illustrated guide for installation, setup, daily work, reports and safe backups.

- One workspace for planning, customers, sales, stock, work and follow-up.
- Customer guide for Business Suite users on supported computers and phones.
- Use the contents on page 2 to jump to the right task.

How to use this 50-page guide

Work from the beginning during setup, or open the page for the feature you need.

Business Suite screen • shown for guidance

WORKFLOW

1. Pages 4–5 explain who should use Planner and Work Tracker.
2. Pages 6–13 cover platforms, installation, trial and activation.
3. Pages 14–38 explain Planner and management features.
4. Pages 39–46 cover Work Tracker, QR, Notes and WhatsApp.
5. Pages 47–50 cover Drive, backup, export and troubleshooting.

BEST FOR

First-time users and trainers

RESULT

Faster learning with fewer mistakes

APPLY NOW

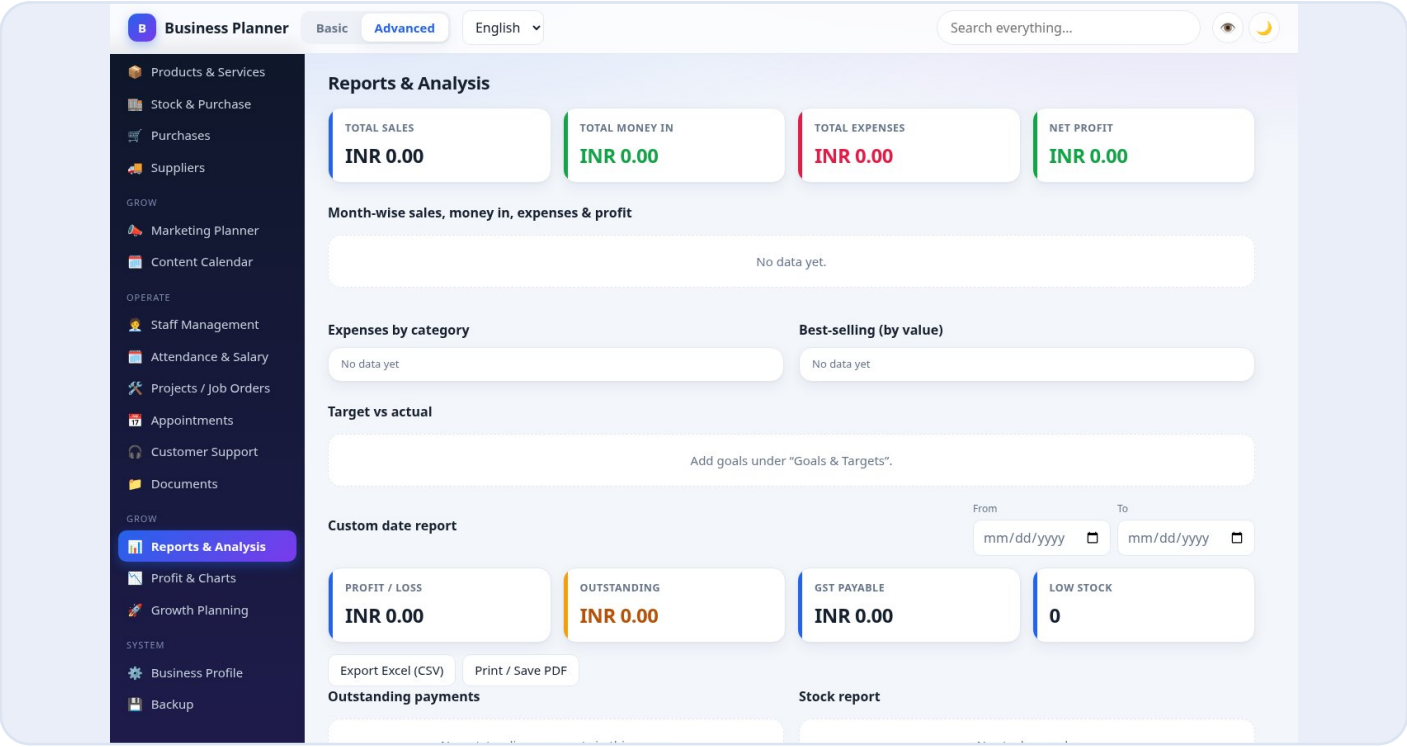

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Every page shows a real Business Suite screen or official installation visual.

Everything connected in one workspace

Business Suite joins planning, selling, money control, operations and data protection.

Business Suite screen • shown for guidance

WORKFLOW

1. Planner handles goals, CRM, sales, cash, stock, staff and analysis.
2. Work Tracker handles jobs, orders, service, reminders and payment history.
3. QR, Notes and WhatsApp support communication and daily work.
4. Google Drive, local backup and restore protect portable data.

BEST FOR

Businesses replacing scattered notebooks and sheets

RESULT

One reliable source for business records

APPLY NOW

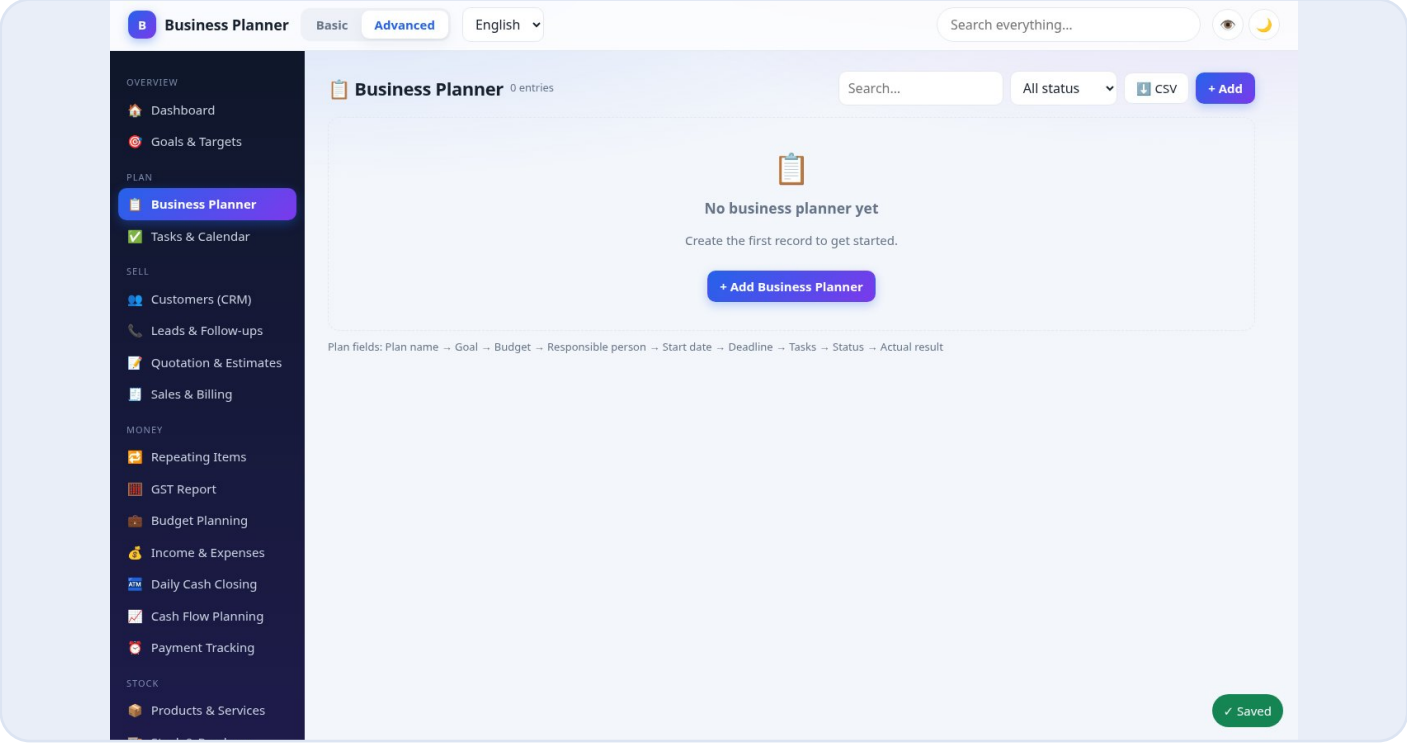

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Core records work locally; internet is needed for licence, Drive and online actions.

Who should use Business Planner?

Planner is for people who need to plan the business and understand sales, money and growth together.

Business Suite screen • shown for guidance

WORKFLOW

1. Retailers and traders managing customers, sales, stock and suppliers.
2. Service businesses preparing quotations, bills and payment follow-ups.
3. Owners tracking targets, budgets, cash flow, profit and growth.
4. Managers coordinating tasks, staff, appointments and marketing.
5. New businesses that want a structured workflow from the first day.

BEST FOR

Owners, office staff, sales teams and accountants

RESULT

Plan → sell → collect → review

APPLY NOW

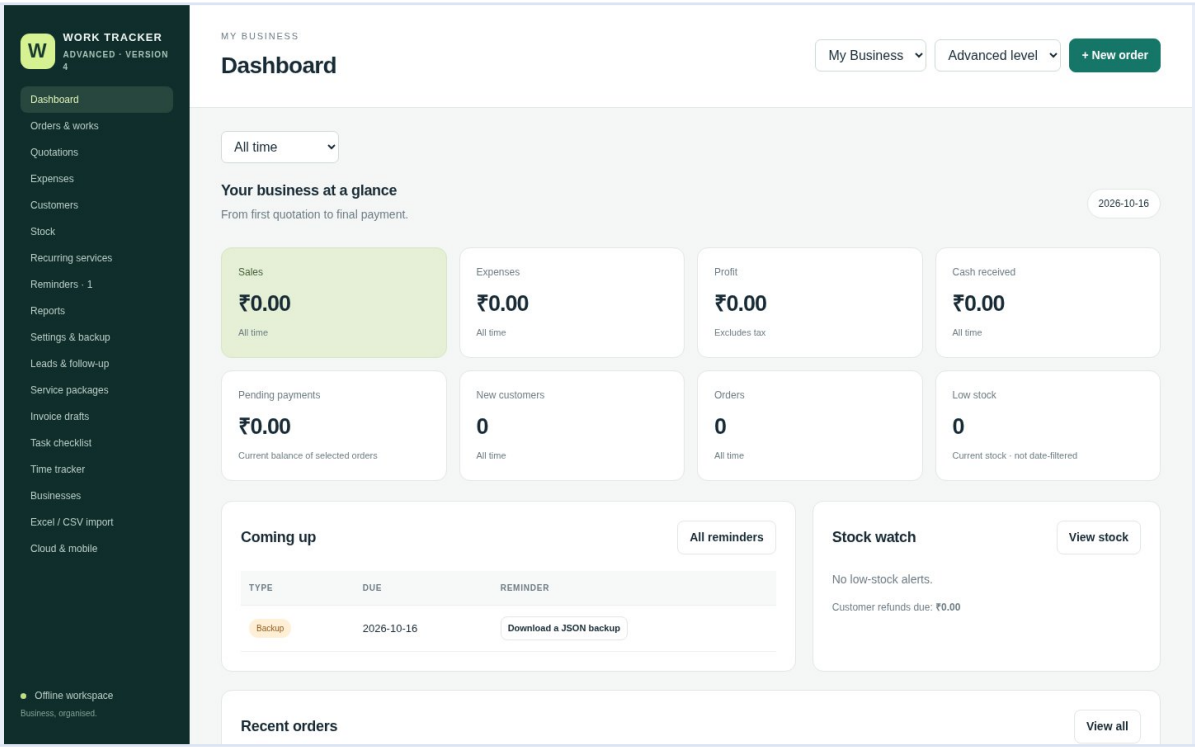

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Use Planner when the main question is: What should the business do next?

Who should use Work Tracker?

Work Tracker is for businesses that complete customer jobs and must follow each job from quotation to final payment.

Business Suite screen • shown for guidance

WORKFLOW

1. Repair, maintenance, installation and field-service businesses.
2. Freelancers, agencies and workshops handling customer orders.
3. Teams tracking job status, materials, service renewals and deadlines.
4. Businesses needing returns, refunds, receipts and customer work history.
5. Multi-business users who require separate operational workspaces.

BEST FOR

Job-based and service-based businesses

RESULT

Quote → job → payment → service

APPLY NOW

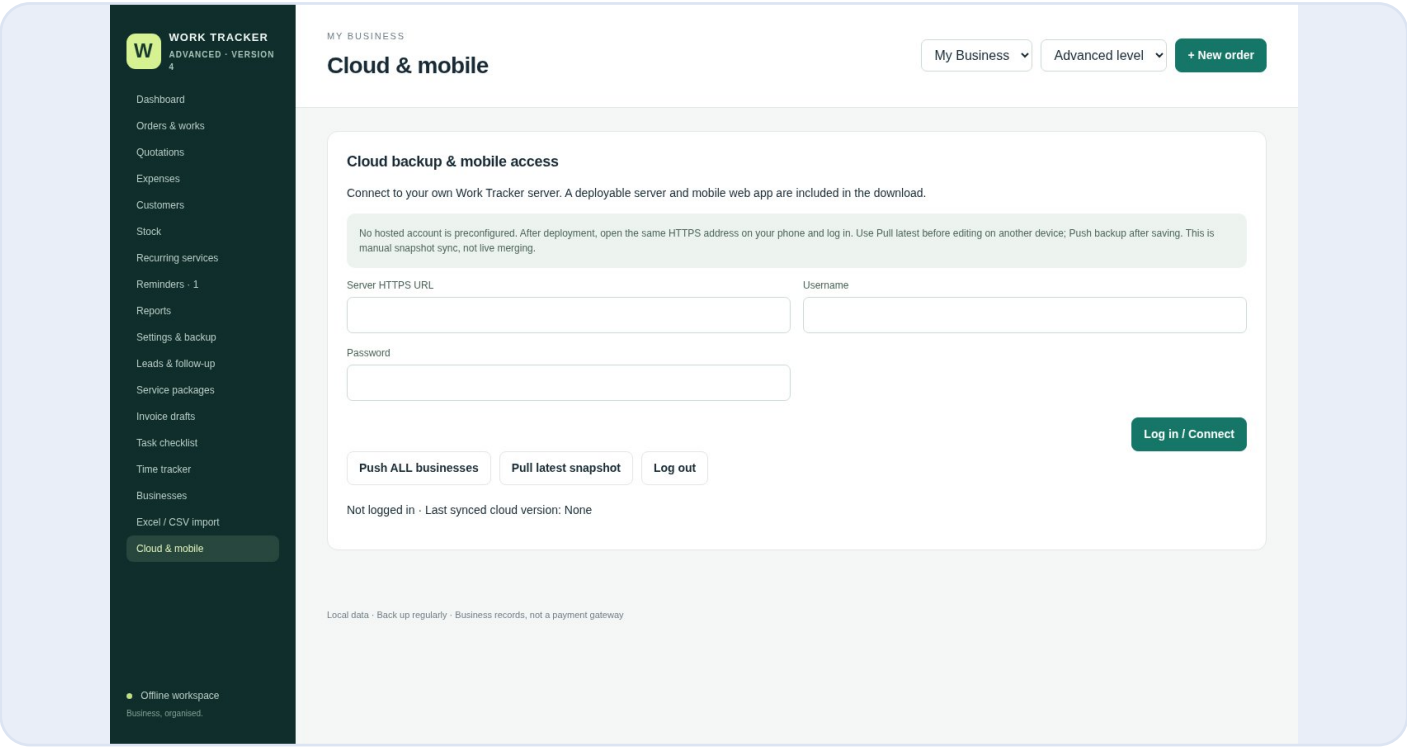

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Use Work Tracker when the main question is: What is happening with this customer job?

Choose the right version

Install the package built for the device you will use.

Business Suite screen • shown for guidance

WORKFLOW

1. Windows: 64-bit desktop installer.
2. macOS: use the package supplied for Intel or Apple Silicon.
3. Android: install the authorised ARM64 APK.
4. Chrome: install the published Chrome Web Store extension.
5. iPhone: current package is for Xcode Simulator on Mac, not a physical iPhone.

BEST FOR

Users choosing a primary device

RESULT

A supported, stable installation

APPLY NOW

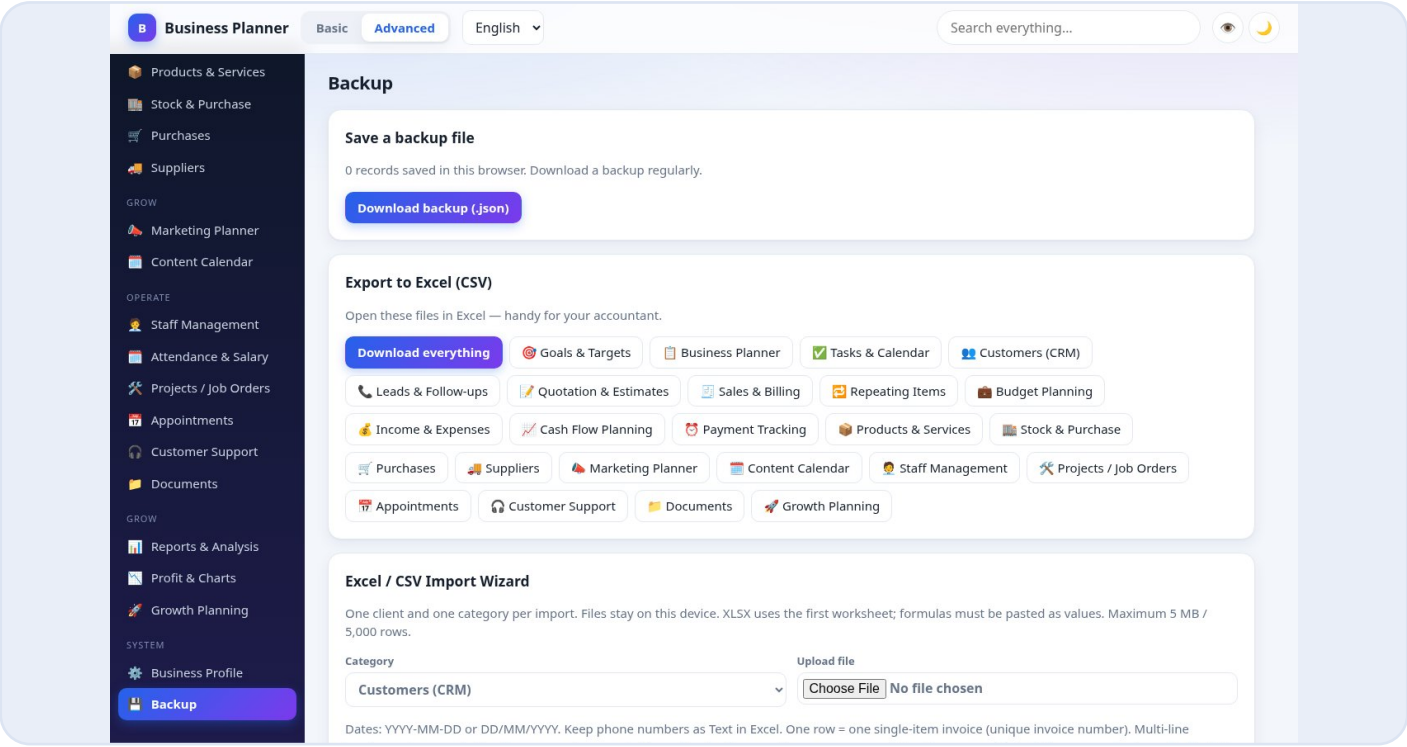

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Confirm platform availability with the seller before purchase.

Before installation or update

Protect existing records and avoid incomplete installation.

Business Suite screen • shown for guidance

WORKFLOW

1. Download only from the official Business Suite source.
2. Create a current JSON or encrypted backup before updating.
3. Keep enough free storage and finish system updates.
4. Have licence details and an internet connection ready.
5. Do not uninstall an older mobile build before its data is backed up.

BEST FOR

Every customer installing or updating

RESULT

A recoverable starting point

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

A backup is essential if Android reports a signature conflict.

Extract the download before running the installer.

BUSINESS SUITE

Windows Installation Guide

Windows EXE | Installation guide | 14 October 2026

Before you begin
Use 64-bit Windows. Back up existing Business Suite data before updating. Keep the supplied installation package together with this guide.

Installation package
Use the Business Suite installation package supplied with this guide by your authorized app provider.

Installation steps
1. Copy the supplied Windows EXE ZIP to the computer and select **Extract all**.
2. Open the extracted **.exe** installer.
3. If SmartScreen displays **Windows protected your PC**, select **More info**.
4. Confirm that this is the Business Suite package supplied with this guide, then select **Run anyway**.
5. Complete the installer and launch Business Suite from the Start menu or desktop shortcut.
6. Activate the license and confirm that Planner, Tracker, export, and backup open correctly.

Security notice
Windows SmartScreen may request confirmation for software supplied directly by the provider. Continue only with the Business Suite package supplied with this guide.

Verify the download
File verification code (SHA-256):

20592c2a645c324df6146eebfd335c8be6918d3131685f1cacaf9b037a9d2cfb

Verification command:

```
Get-FileHash -Algorithm SHA256 .\Business-Suite-Windows-EXE.zip
```

After installation
For automatic Drive sync, install Google Drive for Desktop and select the same Business Suite Sync folder on each licensed computer.

If installation does not work
Extract the ZIP first and check available disk space. Use Run as administrator only when Windows requires it. Antivirus scanning may delay a new installer.

Keep a current backup before updating or removing the app. Local application data may be removed during uninstall.

Business Suite installation guide — Page 1

Business Suite screen • shown for guidance

WORKFLOW

1. Download the Windows ZIP and choose Extract all.
2. Open the extracted folder and run the setup EXE.
3. If SmartScreen appears, choose More info after verifying the source.
4. Complete setup, launch Business Suite and activate.
5. Open Planner, Work Tracker and Backup to confirm installation.

BEST FOR

64-bit Windows users

RESULT

A tested desktop installation

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Do not run setup from inside the ZIP file.

Install on a Mac

Move the application into Applications before first use.

BUSINESS SUITE

macOS Installation Guide

UniversalDMG | Installation guide | 14 October 2026

Before you begin
Use a supported Intel or Apple Silicon Mac. Back up existing Business Suite data before updating. Keep the supplied installation package together with this guide.

Installation package

Use the Business Suite installation package supplied with this guide by your authorized app provider.

Installation steps

1. Copy the supplied macOS DMG ZIP to the Mac and extract it.
2. Open the extracted .dmg file.
3. Drag **Business Suite** into the **Applications** folder.
4. Open Applications, Control-click or right-click **Business Suite**, and select **Open**.
5. Select **Open** again in the security dialog. If it is unavailable, open **System Settings > Privacy & Security** and select **Open Anyway** for Business Suite.
6. Launch the app, activate the license, and confirm that Planner and Tracker open correctly.

Security notice
macOS may request an additional first-launch confirmation for an app supplied directly by the provider. Use Open Anyway only for the Business Suite package supplied with this guide.

Verify the download

File verification code (SHA-256):

d2b1f64ba33a71503914fda7dd7897bad7791a4ffd6e1fdbb0c26271e2ef0ff3c

Verification command:

```
shasum -a 256 ~/Downloads/Business-Suite-macOS-DMG.zip
```

After installation

For automatic Google Drive sync, install Google Drive for Desktop and choose a Business Suite Sync folder inside My Drive. Keep regular local backups as well.

If installation does not work

Confirm that the ZIP and DMG were both opened, that the app was copied to Applications, and that the verification code matches. Use Privacy & Security only for the Business Suite copy supplied with this guide.

Keep a current backup before updating or removing the app. Local application data may be removed during uninstall.

Business Suite Installation guide — Page 1

Business Suite screen • shown for guidance

WORKFLOW

1. Extract the ZIP and open the supplied DMG.
2. Drag Business Suite into Applications.
3. Control-click the app in Applications and choose Open.
4. If blocked, use Privacy & Security → Open Anyway.
5. Activate and test Planner, export and backup.

BEST FOR

Intel and Apple Silicon Mac users

RESULT

A correctly authorised Mac installation

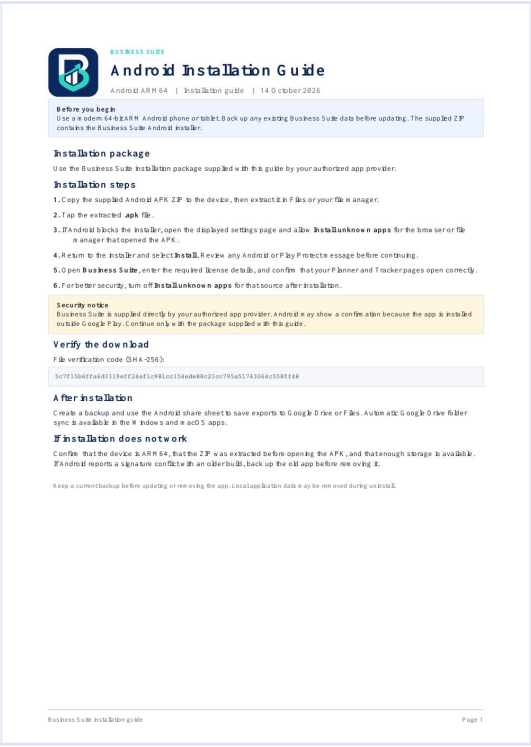

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Use the package intended for your Mac processor.

Allow installation only for the browser or file manager that opened the APK.

BUSINESS SUITE

Android Installation Guide

Android ARM 64 | Installation guide | 14 October 2026

Before you begin
Use a modern 64-bit ARM Android phone or tablet. Back up any existing Business Suite data before updating. The supplied ZIP contains the Business Suite Android installer.

Installation package
Use the Business Suite installation package supplied with this guide by your authorized app provider.

Installation steps
1. Copy the supplied Android APK ZIP to the device, then extract it in Files or your file manager.
2. Tap the extracted **.apk** file.
3. If Android blocks the installer, open the displayed settings page and allow **Install unknown apps** for the browser or file manager that opened the APK.
4. Return to the installer and select **Install**. Review any Android or Play Protect message before continuing.
5. Open **Business Suite**, enter the required license details, and confirm that your Planner and Tracker pages open correctly.
6. For better security, turn off **Install unknown apps** for that source after installation.

Security notice
Business Suite is supplied directly by your authorized app provider. Android may show a confirmation because the app is installed outside Google Play. Continue only with the package supplied with this guide.

Verify the download
File verification code (SHA-256):

5c7f15b6ffa4d3319eff24ef1c981cc154ede88c21cc795a51743064c558ff48

After installation
Create a backup and use the Android share sheet to save exports to Google Drive or Files. Automatic Google Drive folder sync is available in the Windows and macOS apps.

If installation does not work
Confirm that the device is ARM 64, that the ZIP was extracted before opening the APK, and that enough storage is available. If Android reports a signature conflict with an older build, back up the old app before removing it.

Keep a current backup before updating or removing the app. Local application data may be removed during uninstall.

Business Suite Installation guide — Page 1

Business Suite screen • shown for guidance

WORKFLOW

1. Extract the Android ZIP and tap the Business Suite APK.
2. Allow Install unknown apps for that source when prompted.
3. Install, open and activate Business Suite.
4. Test the dashboard and download one backup.
5. Disable Install unknown apps again after installation.

BEST FOR

Supported Android ARM64 phones

RESULT

A safe mobile installation

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Back up the previous app before resolving a signature conflict.

Use the current iPhone Simulator build

The present iPhone package runs in Xcode Simulator on a Mac.

BUSINESS SUITE

iPhone Simulator Installation Guide

macOS + Xcode Simulator | Installation guide | 14 October 2026

Before you begin
A Mac with a current version of Xcode is required. This package is designed for the iPhone Simulator and cannot be installed on a physical iPhone.

Installation package
Use the Business Suite installation package supplied with this guide by your authorized app provider.

Installation steps
1. Copy the supplied iPhone Simulator ZIP to the Mac and extract it.
2. Open Xcode and select **Xcode > Open Developer Tool > Simulator**.
3. Choose an iPhone model in the Simulator and wait for it to finish starting.
4. Drag the extracted **Business Suite.app** onto the running Simulator window.
5. Select the Business Suite icon in the Simulator to launch the app.
6. If a new Simulator is created later, repeat the drag-and-drop installation for that Simulator.

Security notice
This package is for authorized use in Apple's iPhone Simulator. A physical iPhone, TestFlight, or App Store edition is a separately signed distribution.

Verify the download
File verification code (SHA-256):

86815eb7dcc46bd7d628e512abaae503b1f937613ca2c3a801273bab98aadb88

Verification command:

```
shasum -a 256 ~/Downloads/Business-Suite-iPhone-Simulator.zip
```

After installation
Use the iOS share sheet to save exported files to Files or Google Drive. Simulator data is separate from data on a physical phone and can be erased when the Simulator is reset.

If installation does not work
Update Xcode, start the Simulator before dragging the app, and extract the ZIP fully. If macOS blocks the extracted app, confirm that it is the package supplied with this guide and open it through the running Simulator.

Keep a current backup before updating or removing the app. Local application data may be removed during uninstall.

Business Suite Installation guide — Page 1

Business Suite screen • shown for guidance

WORKFLOW

1. Install a current version of Xcode and start an iPhone Simulator.
2. Extract the supplied Simulator package.
3. Drag Business Suite.app onto the running Simulator.
4. Launch it and complete the initial setup.
5. Back up before resetting or erasing the Simulator.

BEST FOR

Developers and testers using a Mac

RESULT

A working Simulator installation

APPLY NOW

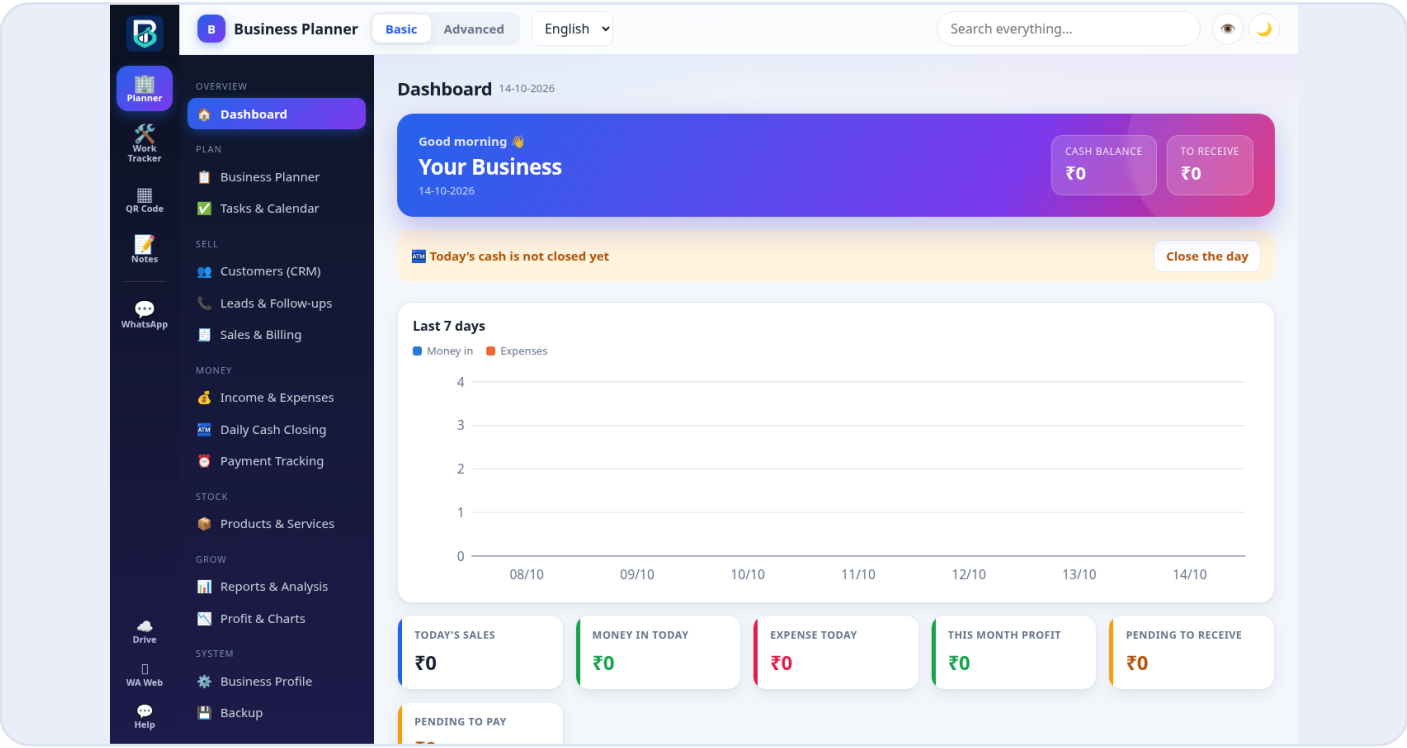

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

This package does not install on a physical iPhone.

Install the Chrome extension

Use the published Store listing so every customer receives the stable extension identity.

Business Suite screen • shown for guidance

WORKFLOW

1. Open the official Business Suite Chrome Web Store listing.
2. Choose Add to Chrome and review permissions.
3. Pin Business Suite from Chrome's Extensions menu.
4. Open it, activate and test Planner and Drive.
5. Use Load unpacked only for development testing.

BEST FOR

Chrome and Chromebook users

RESULT

A consistent Store-managed installation

APPLY NOW

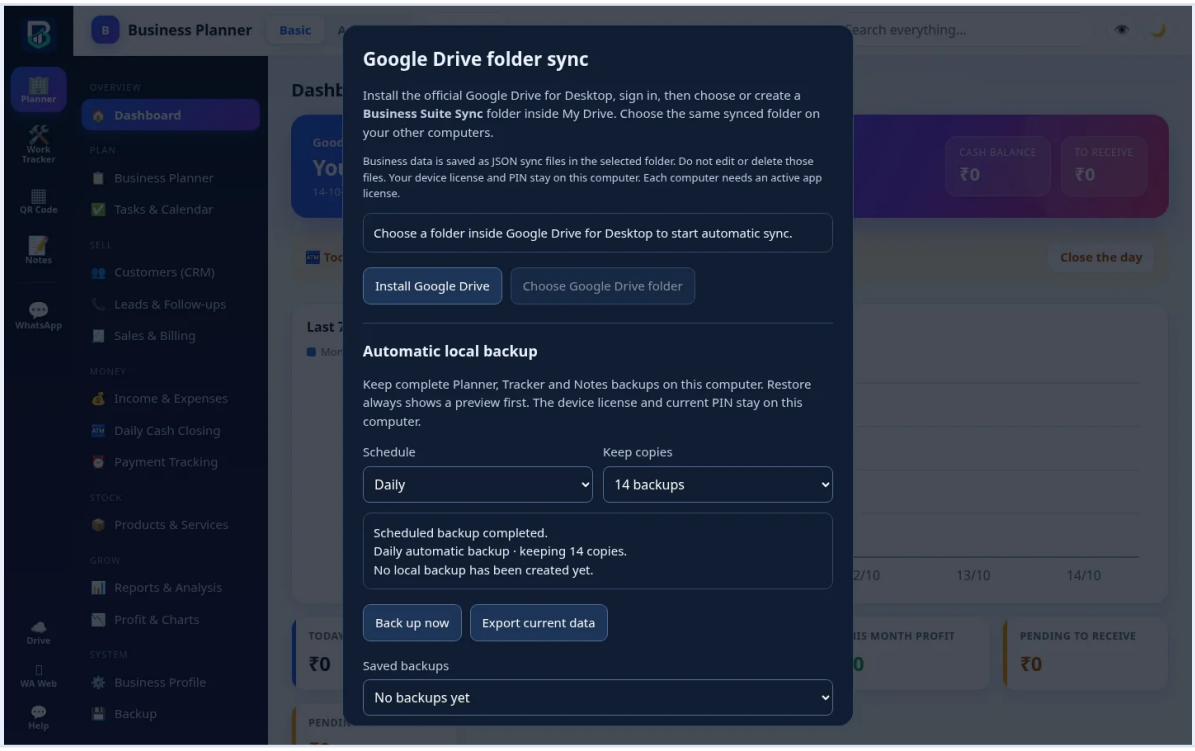

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Store installation prevents per-computer extension-ID problems.

Trial, activation and first launch

Use the trial to confirm the workflow before selecting a paid plan.

Business Suite screen • shown for guidance

WORKFLOW

1. Read the remaining trial time at the top of the app.
2. Open View plans when ready to activate.
3. Enter licence details from the authorised seller.
4. Test one record, one PDF/CSV export and one backup.
5. Keep the client PIN private and contact support if forgotten.

BEST FOR

New customers evaluating Business Suite

RESULT

A verified working setup

APPLY NOW

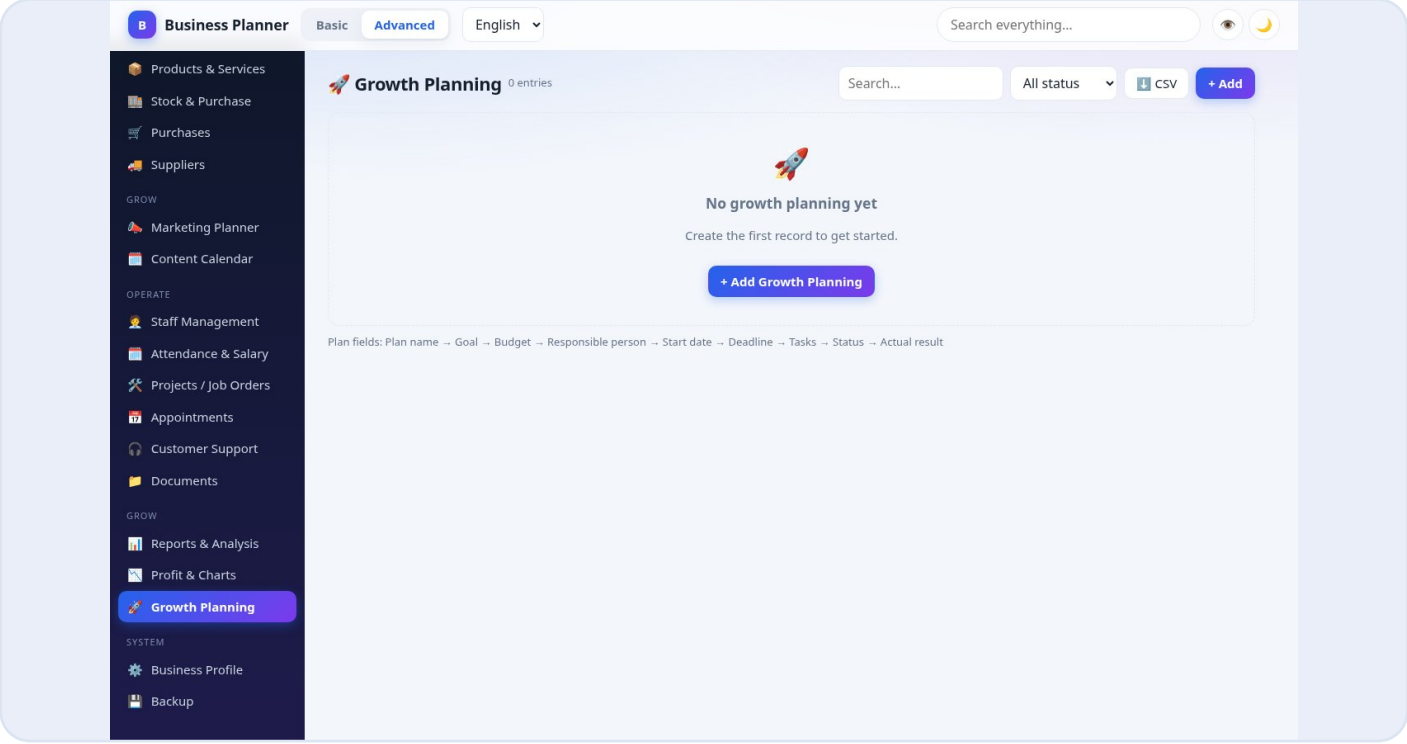

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Reinstalling should not be used to obtain a new trial.

Understand the workspace map

The main navigation keeps all major modules within one or two taps.

Business Suite screen • shown for guidance

WORKFLOW

1. Planner contains planning, customers, money, stock and reports.
2. Work Tracker contains jobs, orders, service and reminders.
3. QR and Notes are focused utility modules.
4. WhatsApp prepares messages; Drive manages cloud copies.
5. On a phone, use bottom navigation and scroll inside the module.

BEST FOR

All users moving between modules

RESULT

Fast navigation without lost context

APPLY NOW

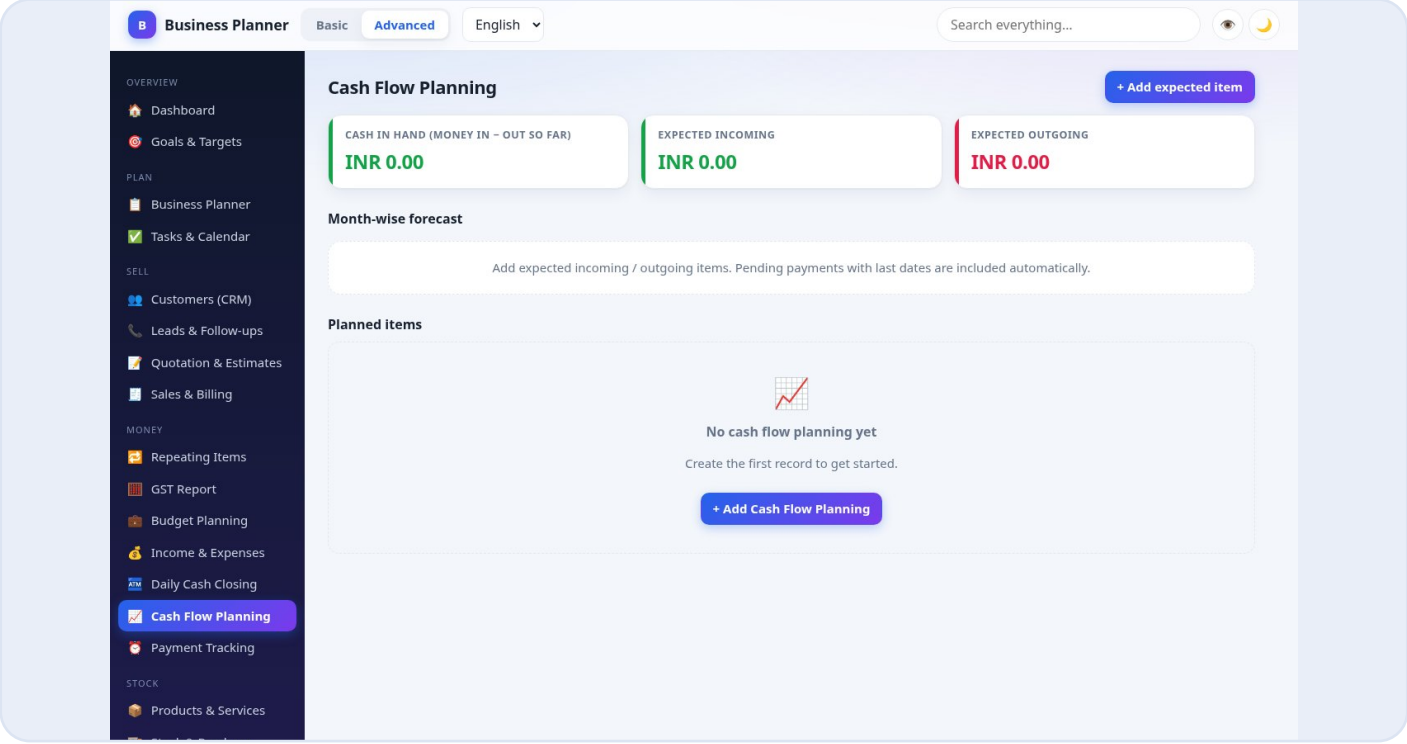

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Start from Planner when you are unsure where a record belongs.

Read the Planner dashboard

The home screen turns saved records into a quick daily picture.

Business Suite screen • shown for guidance

WORKFLOW

1. Check cash balance, receivables and today's cash-close status.
2. Review recent money-in and expense movement.
3. Scan sales, profit, pending receipts and pending payments.
4. Open due tasks, follow-ups and active plans.
5. Investigate unusual totals by opening source records.

BEST FOR

Owners and managers beginning the day

RESULT

Know what needs attention today

APPLY NOW

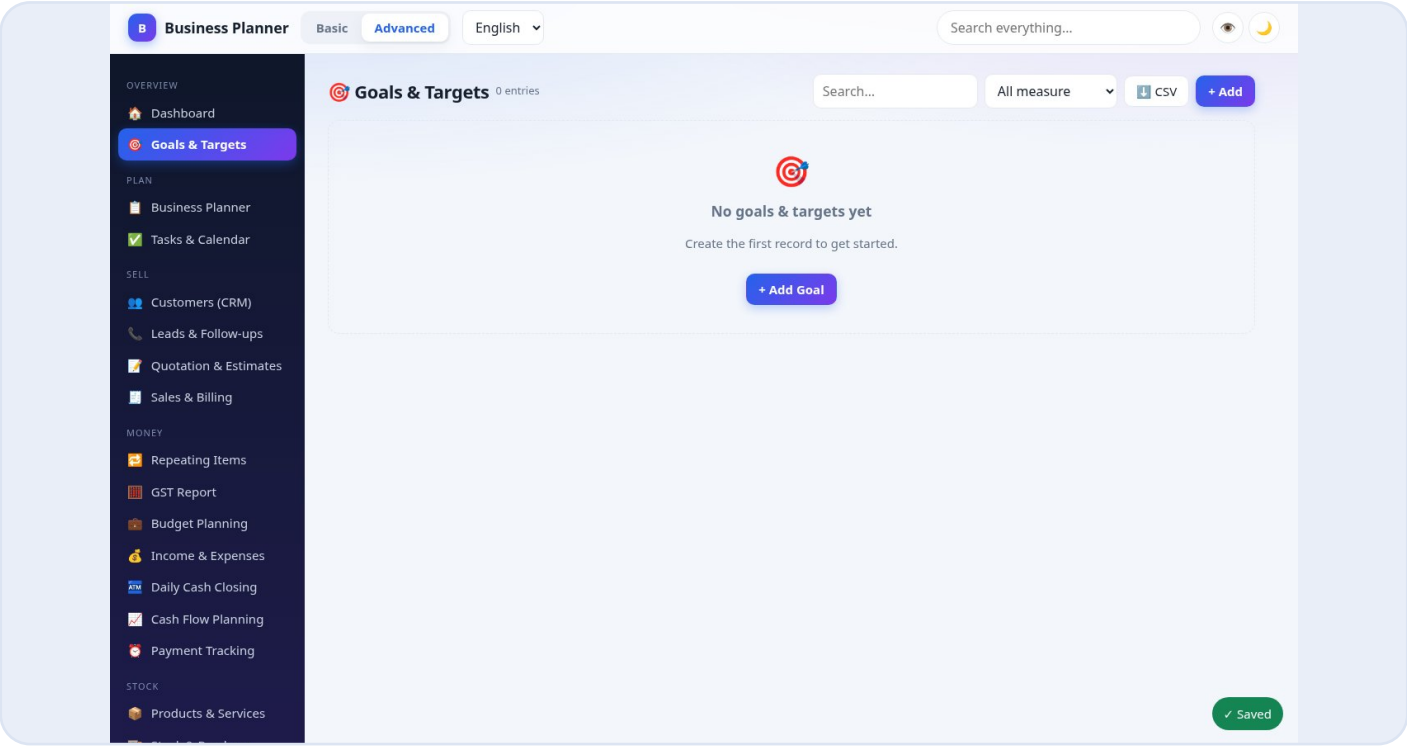

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Dashboard totals are only as accurate as the records entered.

Basic and Advanced modes

Show the amount of detail that matches the user's role and experience.

Business Suite screen • shown for guidance

WORKFLOW

1. Basic mode presents essential daily tools.
2. Advanced reveals GST, budgets, cash flow, staff and marketing.
3. Changing mode changes visibility; it does not delete records.
4. Train new staff in Basic before adding advanced responsibilities.
5. Use Search when a module is not immediately visible.

BEST FOR

New users, experienced managers and trainers

RESULT

A cleaner role-appropriate workspace

APPLY NOW

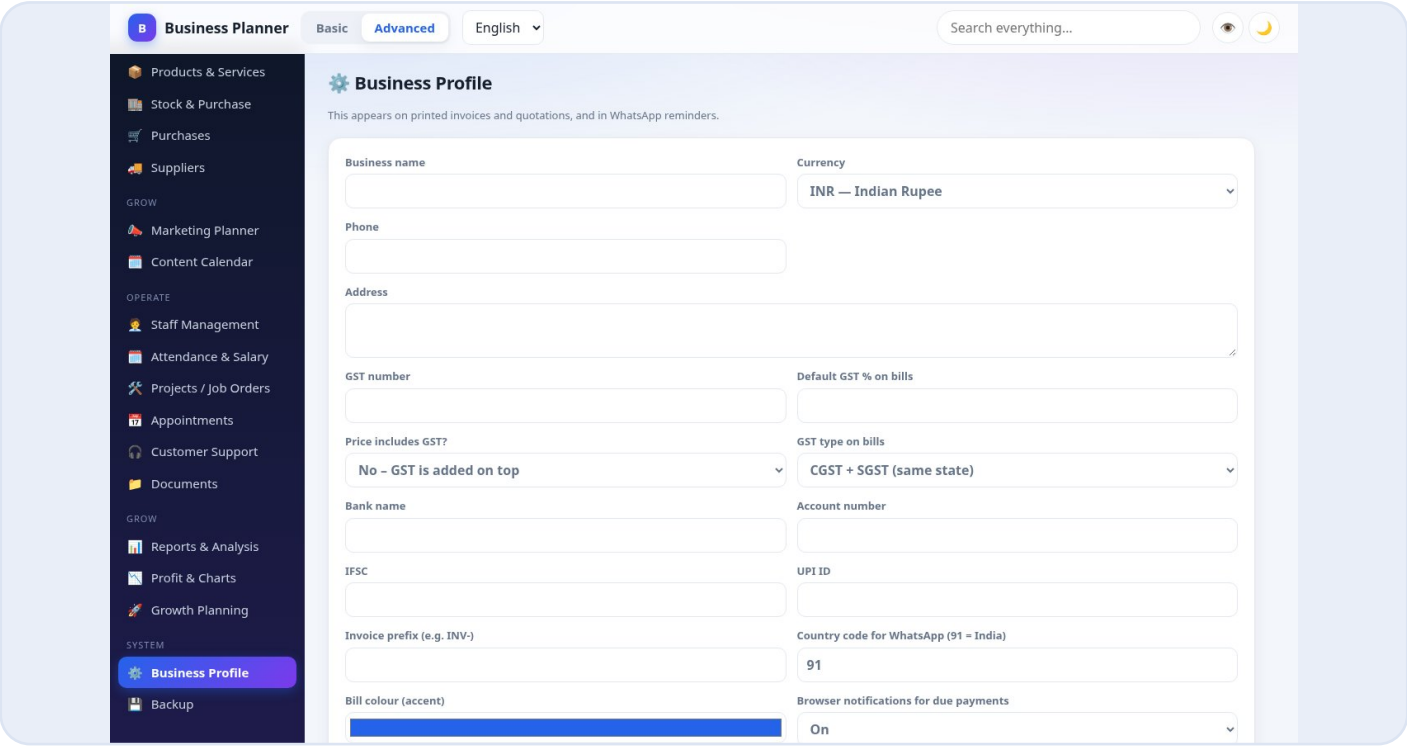

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Switching view modes is safe for existing records.

Set up the business profile

Complete business identity before creating customer-facing documents.

Business Suite screen • shown for guidance

WORKFLOW

1. Enter business name, phone, email and address.
2. Add registration or tax details where applicable.
3. Select the default country code, currency and language.
4. Review terms, invoice prefix and profile details.
5. Create a sample quotation and confirm printed identity.

BEST FOR

Owners and administrators

RESULT

Consistent quotations, invoices and reports

APPLY NOW

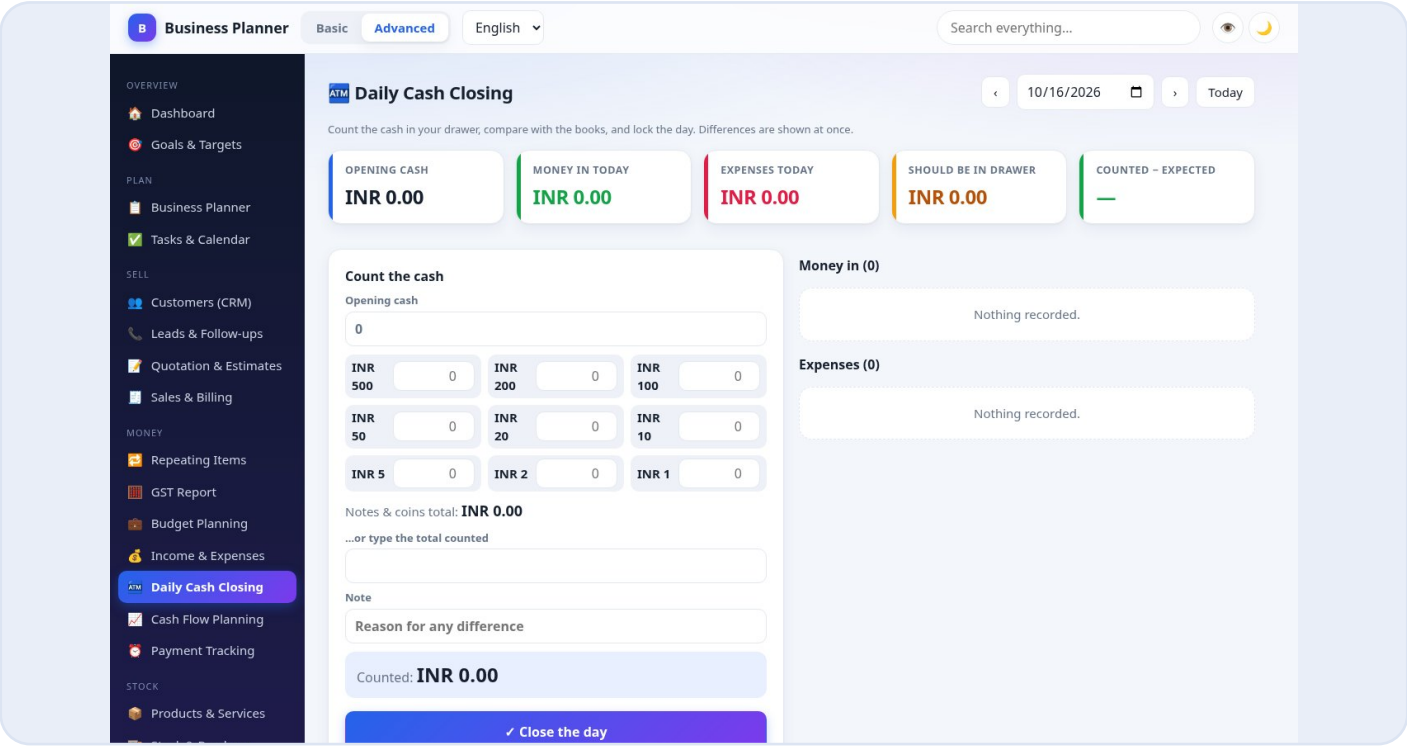

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Update the profile when official business details change.

Currency and language settings

Display values in the format customers and staff recognise.

Business Suite screen • shown for guidance

WORKFLOW

1. Select currency used for labels, cash counts and new records.
2. Review symbols and denominations after changing currency.
3. Changing currency does not convert old amounts or exchange rates.
4. Select a supported interface language and test printed output.
5. Convert international amounts before entry and record the rate.

BEST FOR

Businesses operating in any supported country

RESULT

Clear, consistent monetary records

APPLY NOW

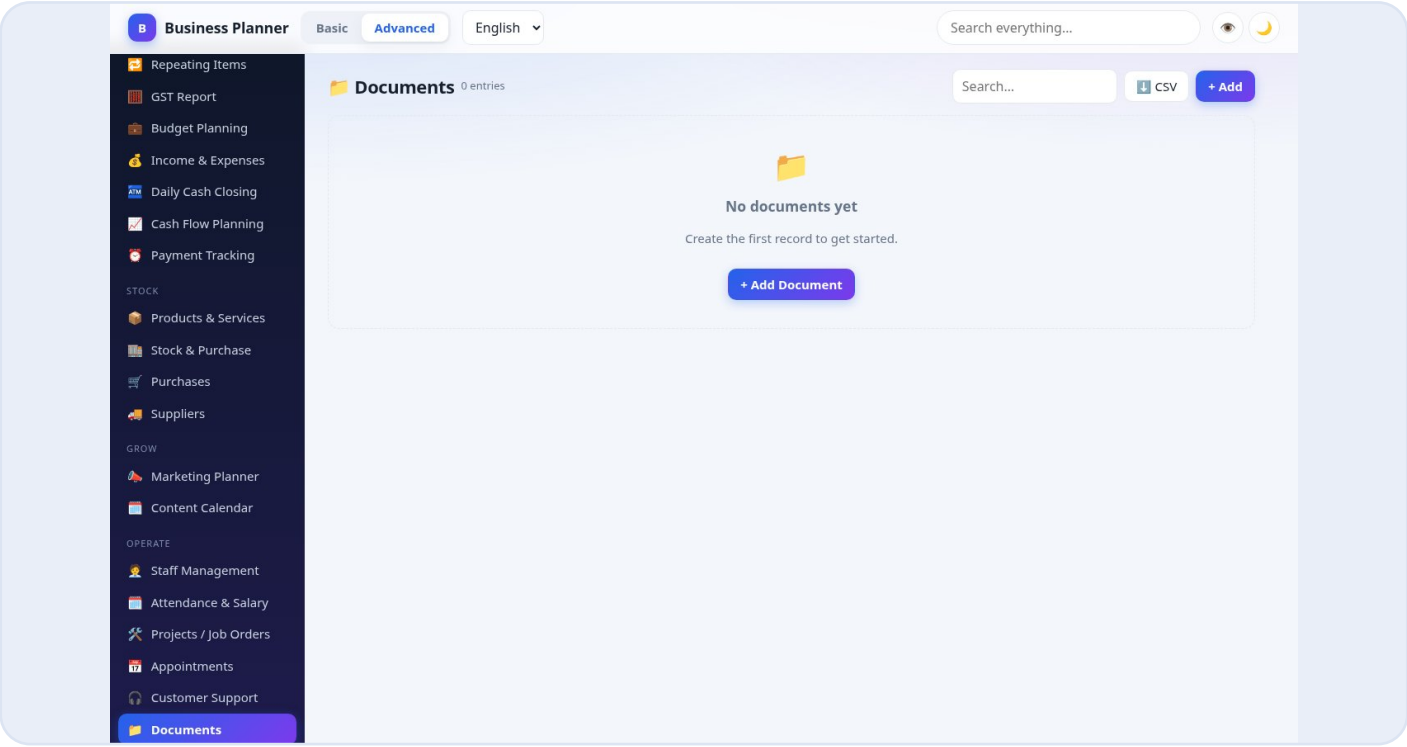

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Never treat a currency-label change as automatic conversion.

Search, visibility, theme and PIN

Find work faster and reduce casual exposure of sensitive figures.

Business Suite screen • shown for guidance

WORKFLOW

1. Use Search everything to locate tools and records.
2. Use visibility controls to hide or show sensitive amounts.
3. Choose light or dark theme for comfortable viewing.
4. Create a PIN where offered and store it securely.
5. A PIN does not replace device security or backups.

BEST FOR

Shared-device users and busy operators

RESULT

Faster access with sensible privacy

APPLY NOW

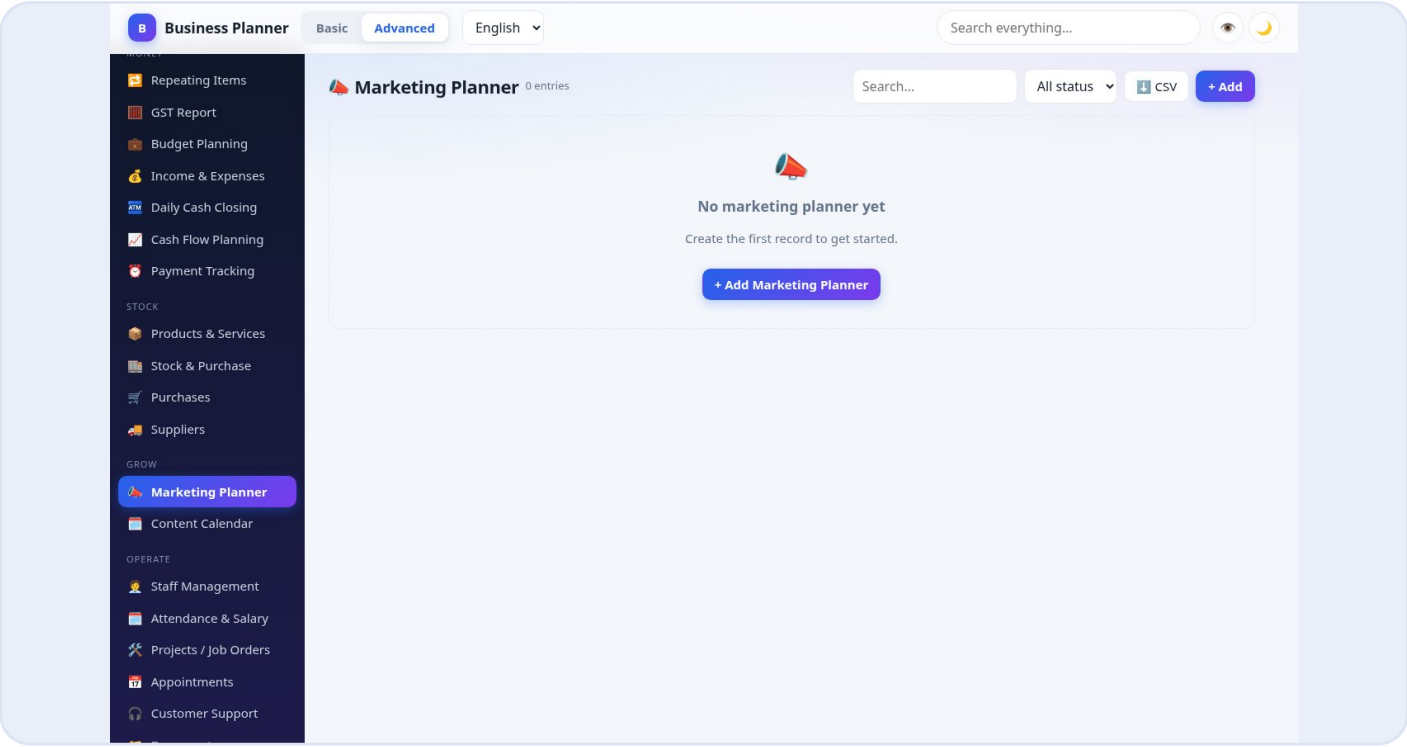

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Do not store passwords or recovery codes in ordinary notes.

Goals and targets

Turn a broad ambition into a measurable result and review date.

Business Suite screen • shown for guidance

WORKFLOW

1. Name the goal and choose a sales, profit or customer measure.
2. Select the period and enter the target value.
3. Review actual progress from saved business records.
4. Discuss blockers and choose the next action.
5. Close or revise a target only with a recorded reason.

BEST FOR

Owners and managers setting direction

RESULT

Measurable progress instead of vague goals

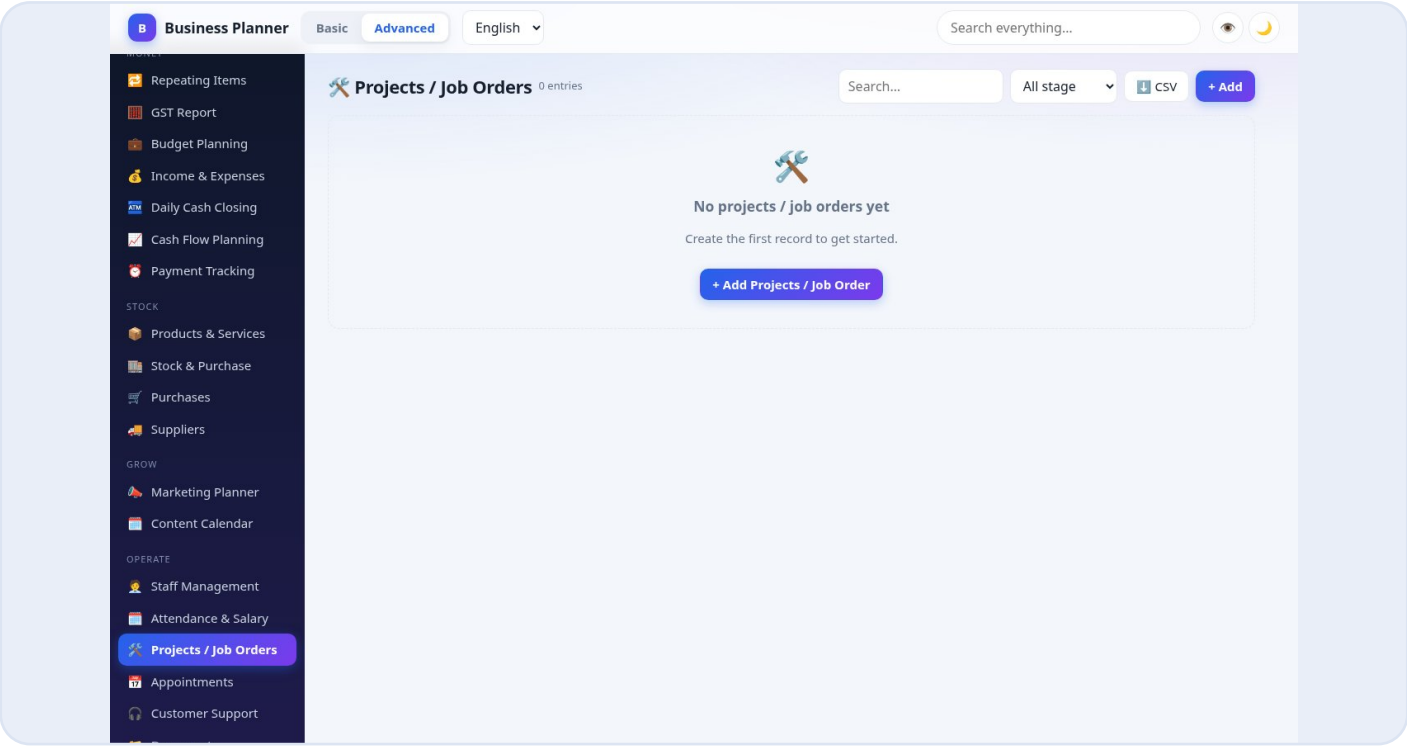

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

A useful goal has an owner, number and deadline.

Build a practical plan around a goal, budget, owner and deadline.

Business Suite screen • shown for guidance

WORKFLOW

1. Create the plan and link it to a clear goal.
2. Enter budget, responsible person, start and deadline.
3. List important tasks and expected result.
4. Update status as work moves forward.
5. Review overdue and on-hold plans every week.

BEST FOR

Owners, project leads and department heads

RESULT

A visible path from idea to result

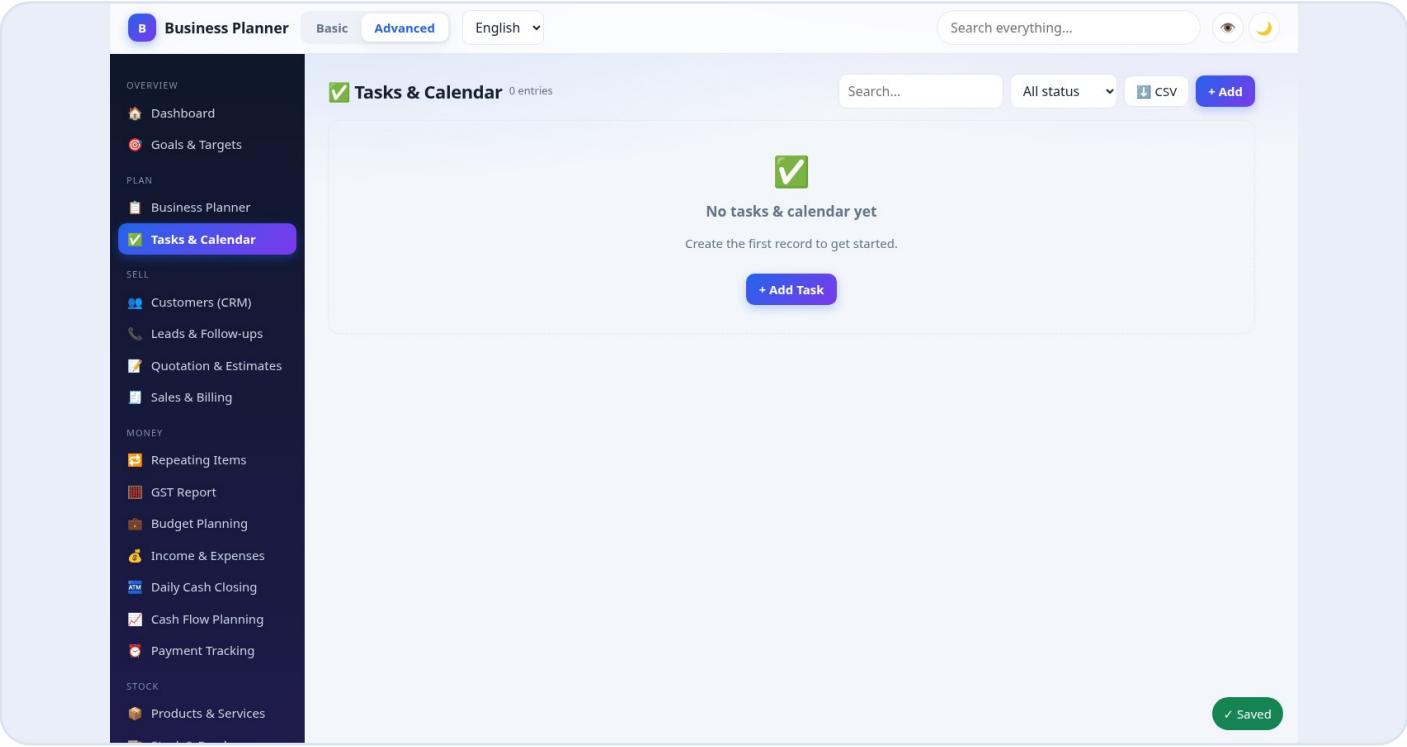

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Keep active plans short enough to review regularly.

Give every commitment an owner, priority and date.

Business Suite screen • shown for guidance

WORKFLOW

1. Create a precise task title and assign responsibility.
2. Set priority, due date and reminder date.
3. Use progress and status to show real movement.
4. Review today's and overdue tasks daily.
5. Mark complete only after the result is verified.

BEST FOR

Individuals and teams managing daily actions

RESULT

Fewer missed commitments

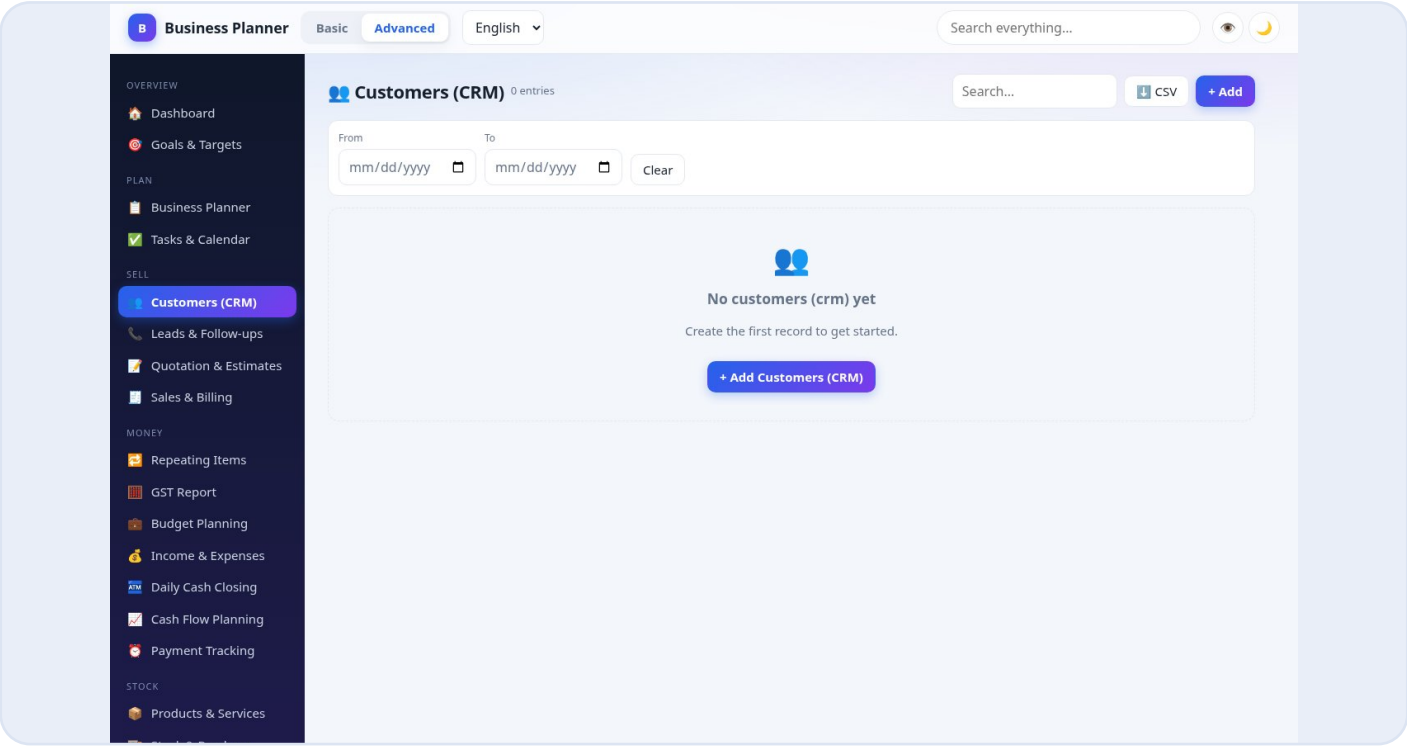

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Tasks without dates are easy to forget.

Keep customer identity, needs and commercial history together.

Business Suite screen • shown for guidance

WORKFLOW

1. Search first to avoid duplicate customer records.
2. Save name, phone, place and GST number where required.
3. Record customer needs and useful notes.
4. Reuse the customer in sales, follow-ups and statements.
5. Update details after each important change.

BEST FOR

Retail, wholesale and service businesses

RESULT

One reliable customer record

APPLY NOW

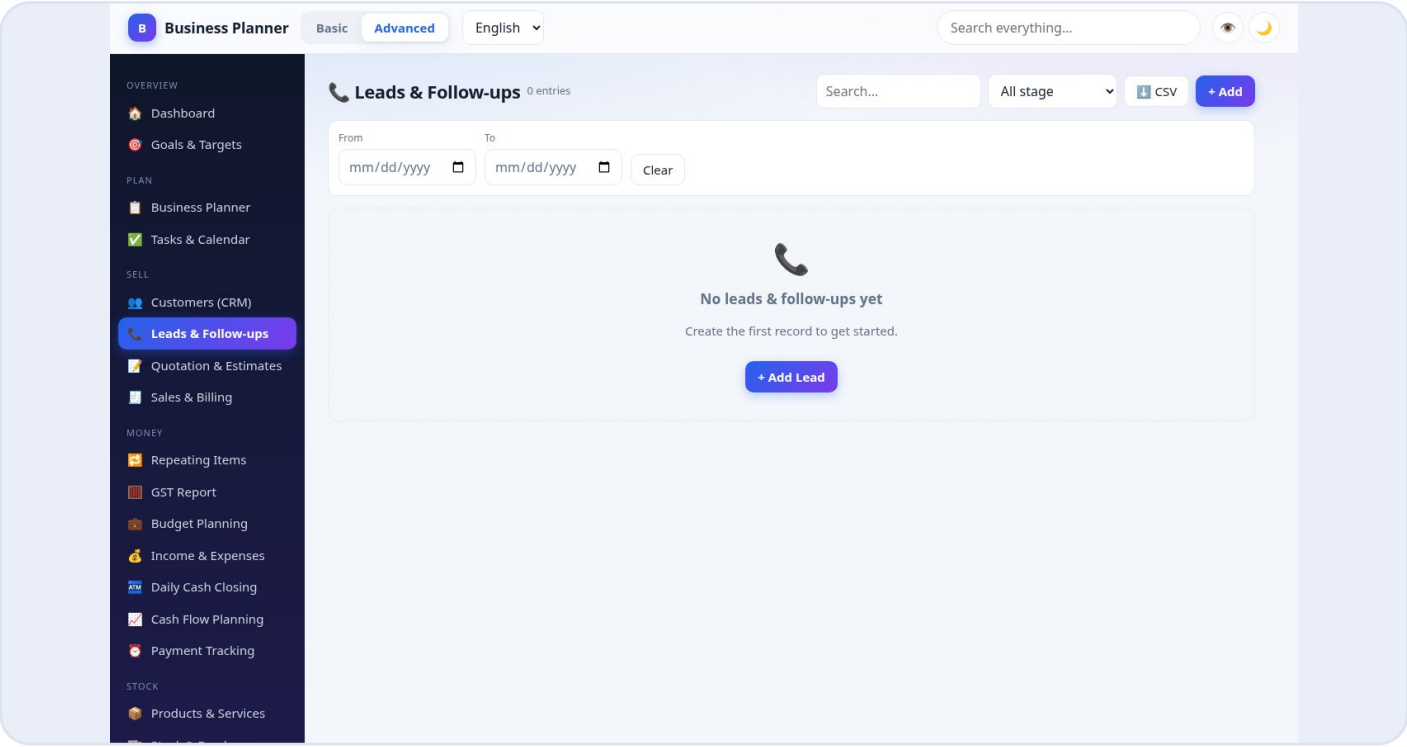

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Collect only information needed for the business relationship.

Leads and follow-ups

Give every enquiry a next action instead of letting it disappear.

Business Suite screen • shown for guidance

WORKFLOW

1. Record source, interest, stage and expected value.
2. Save a phone number and next follow-up date.
3. Move the lead through New, Contacted, Quotation, Won or Lost.
4. Prepare a message or quotation from the next action.
5. Record why leads are won or lost for later analysis.

BEST FOR

Sales teams, owners and front-office staff

RESULT

A visible sales pipeline

APPLY NOW

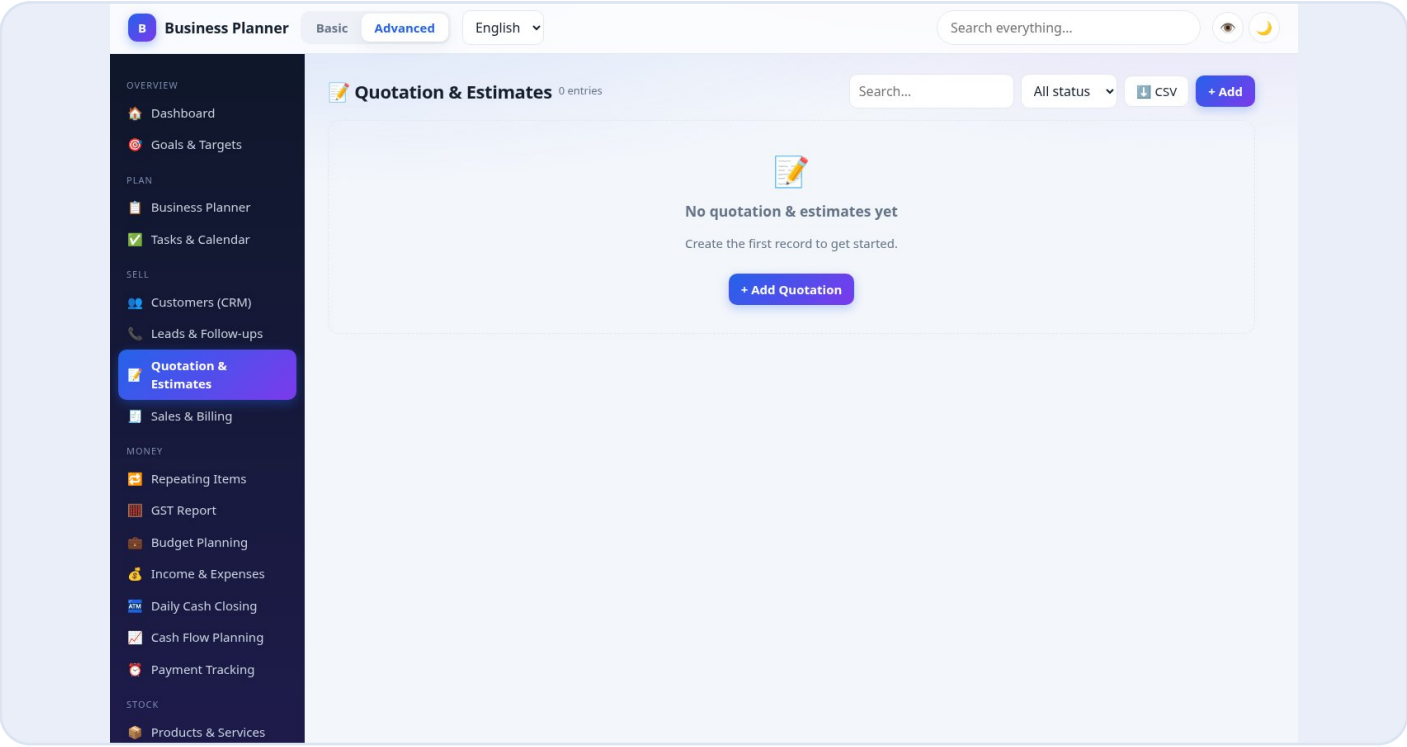

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

A lead without a next date is easily forgotten.

Quotations and estimates

Prepare a professional offer before work or delivery begins.

Business Suite screen • shown for guidance

WORKFLOW

1. Choose customer and enter quotation number and date.
2. Describe items or scope and enter the correct amount.
3. Set validity, status and customer terms.
4. Preview and export the PDF before sending.
5. When accepted, convert it into the next billing or work step.

BEST FOR

Sales, service and project businesses

RESULT

Clear scope, price and validity

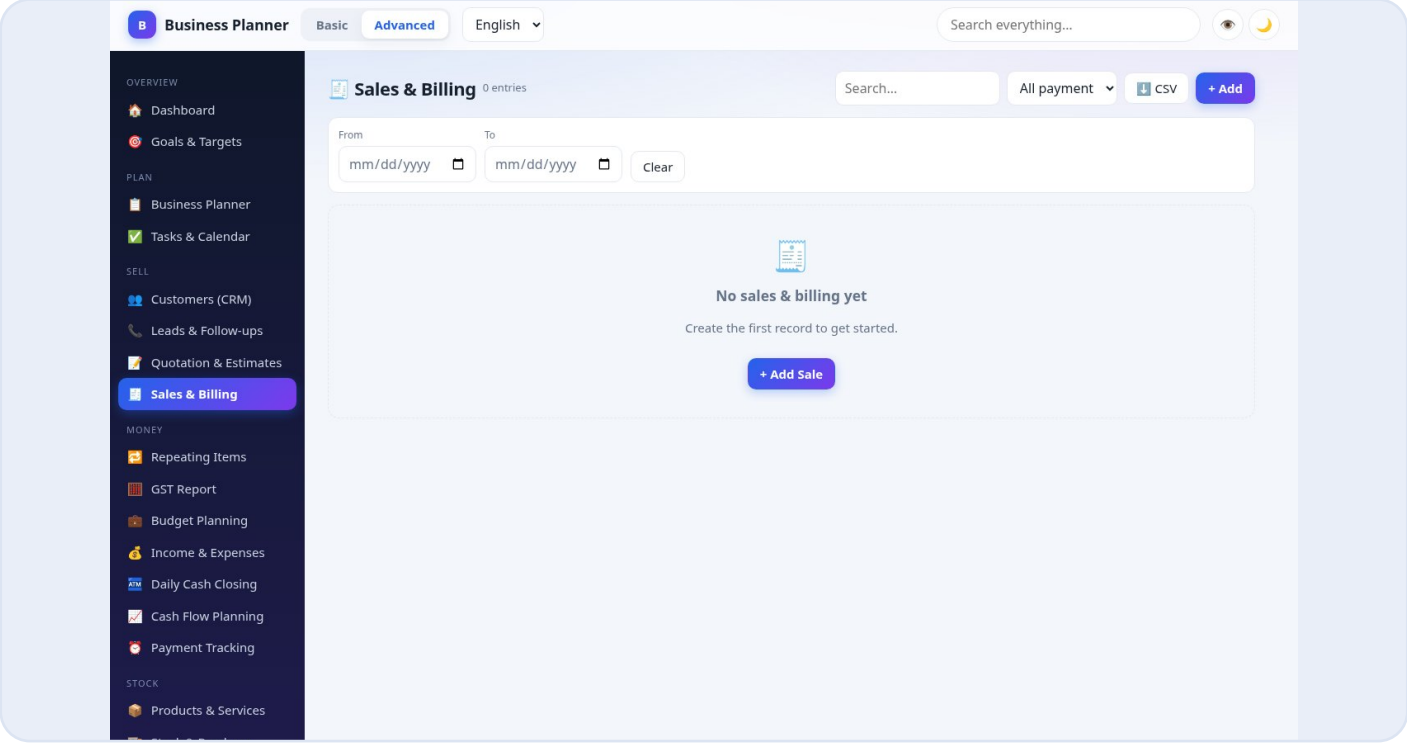

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Record revisions instead of replacing a sent quotation.

Record the sale, tax, payment status and customer balance accurately.

Business Suite screen • shown for guidance

WORKFLOW

1. Choose customer, item, quantity, rate, discount and GST.
2. Check invoice number, sale date and due date.
3. Record Pending, Partial or Paid from payment evidence.
4. Export the customer document and retain the record.
5. Review balance and stock effects after saving.

BEST FOR

Businesses issuing bills or invoices

RESULT

Sales records that support collection and reporting

APPLY NOW

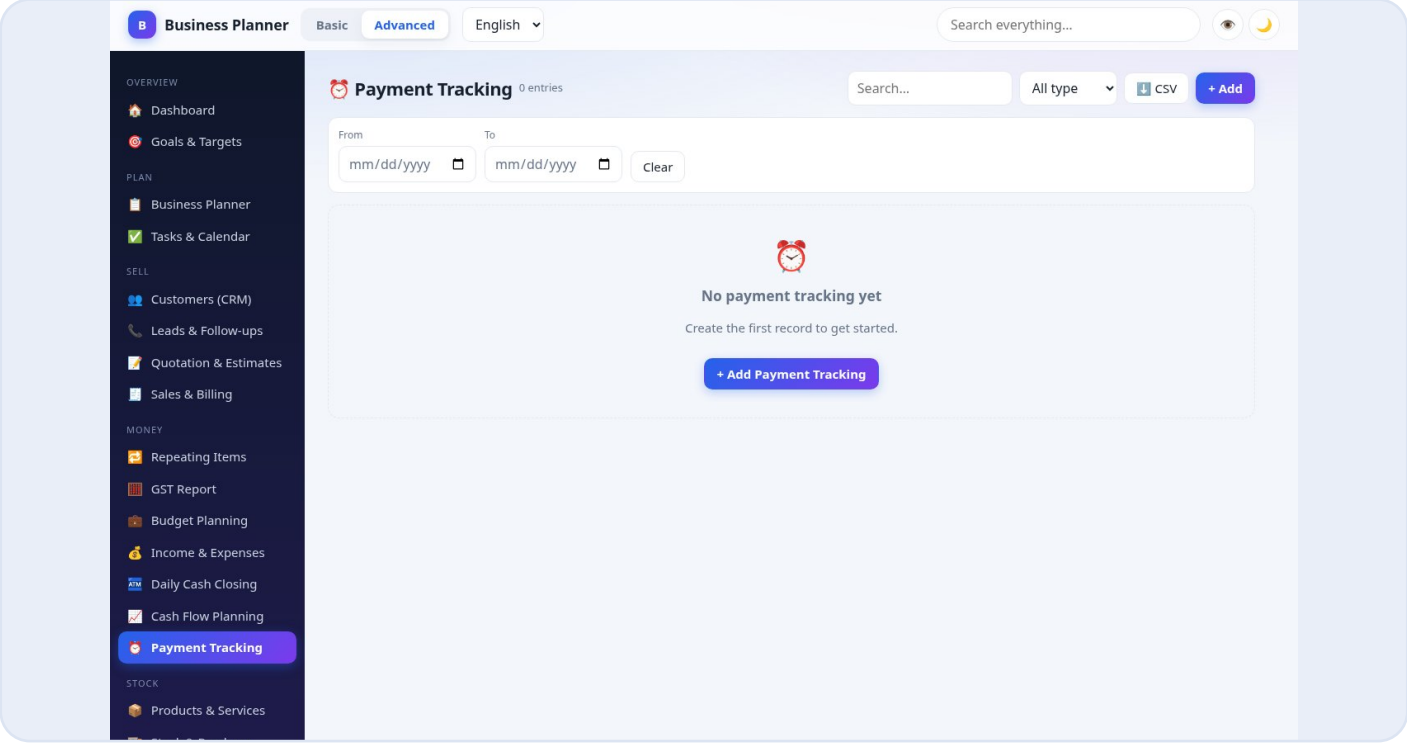

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Never mark a sale paid before money is confirmed.

Payment tracking

Know who must pay, who must be paid and what is overdue.

Business Suite screen • shown for guidance

WORKFLOW

1. Select To receive or To pay and enter the party.
2. Record amount, received amount, due date and instalment.
3. Use partial status while a balance remains.
4. Prepare a checked reminder when the due date passes.
5. Reconcile the list with bank and cash records.

BEST FOR

Owners, accounts staff and collection teams

RESULT

Fewer missed receivables and payables

APPLY NOW

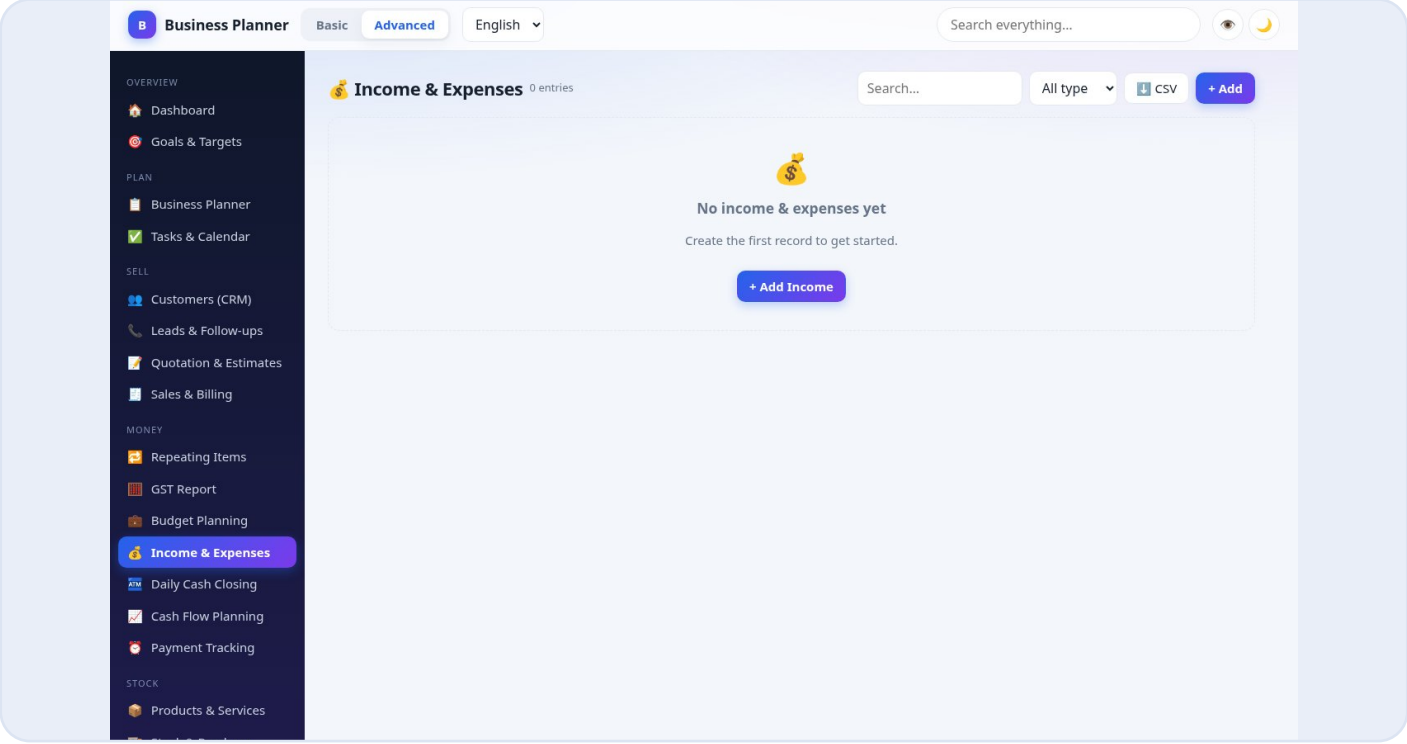

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

References and dates make disputes easier to resolve.

Income and expenses

Capture money movement while purpose and evidence are still clear.

Business Suite screen • shown for guidance

WORKFLOW

1. Choose Income or Expense and consistent categories.
2. Enter date, amount and an explanatory note.
3. Separate business and personal transactions.
4. Review category totals before closing a period.
5. Correct source records before relying on profit reports.

BEST FOR

Owners, cashiers and accounts staff

RESULT

Reliable cash and profit analysis

APPLY NOW

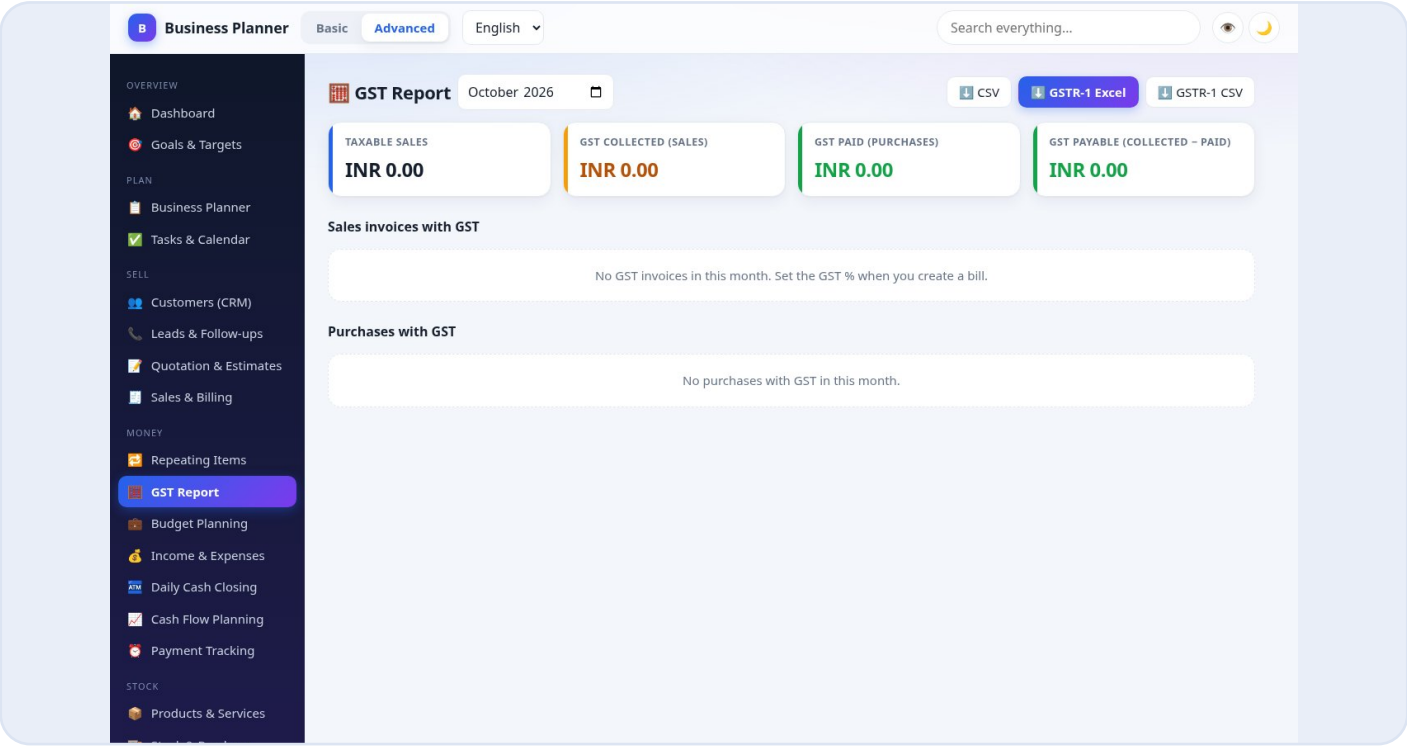

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Regular entry is more accurate than month-end memory.

Daily cash closing

Compare expected cash with the money physically counted.

Business Suite screen • shown for guidance

WORKFLOW

1. Confirm opening cash, money in and recorded expenses.
2. Count notes and coins using displayed denominations.
3. Enter a manually counted total when needed.
4. Explain any difference in the notes field.
5. Close the day and review repeated variances.

BEST FOR

Cashiers, shop owners and supervisors

RESULT

A documented end-of-day cash check

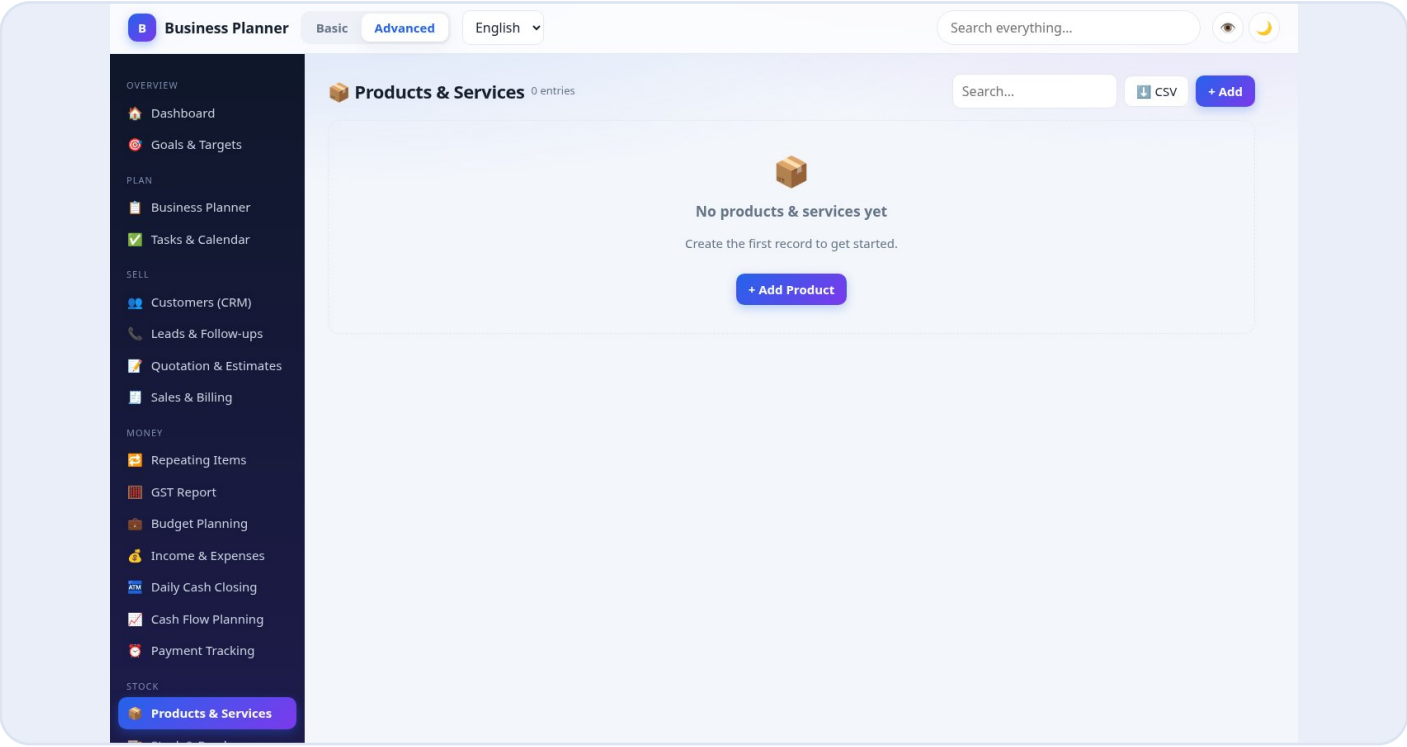

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Currency labels change display; they do not convert saved values.

Create consistent items for faster sales, quotations and work records.

Business Suite screen • shown for guidance

WORKFLOW

1. Create a clear name and choose Product or Service.
2. Enter cost and selling price accurately.
3. Review calculated profit and margin.
4. Avoid duplicate names for the same item.
5. Update prices through a controlled review.

BEST FOR

Retailers, traders and service providers

RESULT

Faster entry with cleaner reporting

APPLY NOW

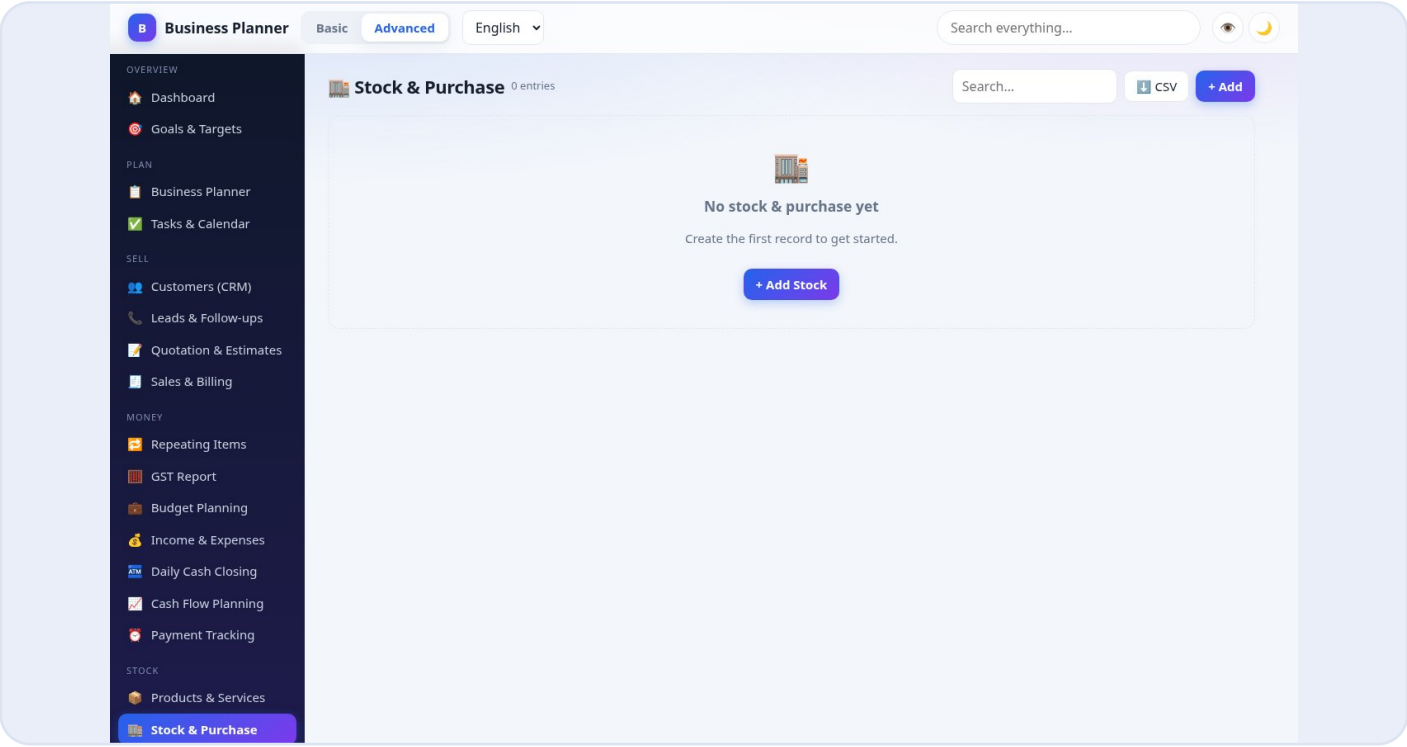

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Separate products from services when stock behaviour differs.

Stock and purchases

Keep available quantity meaningful by recording every movement.

Business Suite screen • shown for guidance

WORKFLOW

1. Create stock balance, low-stock level and reorder quantity.
2. Link the usual supplier and purchase status.
3. Record purchases when goods are received.
4. Investigate negative or unexpected quantities.
5. Reconcile with a regular physical count.

BEST FOR

Retail, wholesale and inventory businesses

RESULT

Better availability and purchasing decisions

APPLY NOW

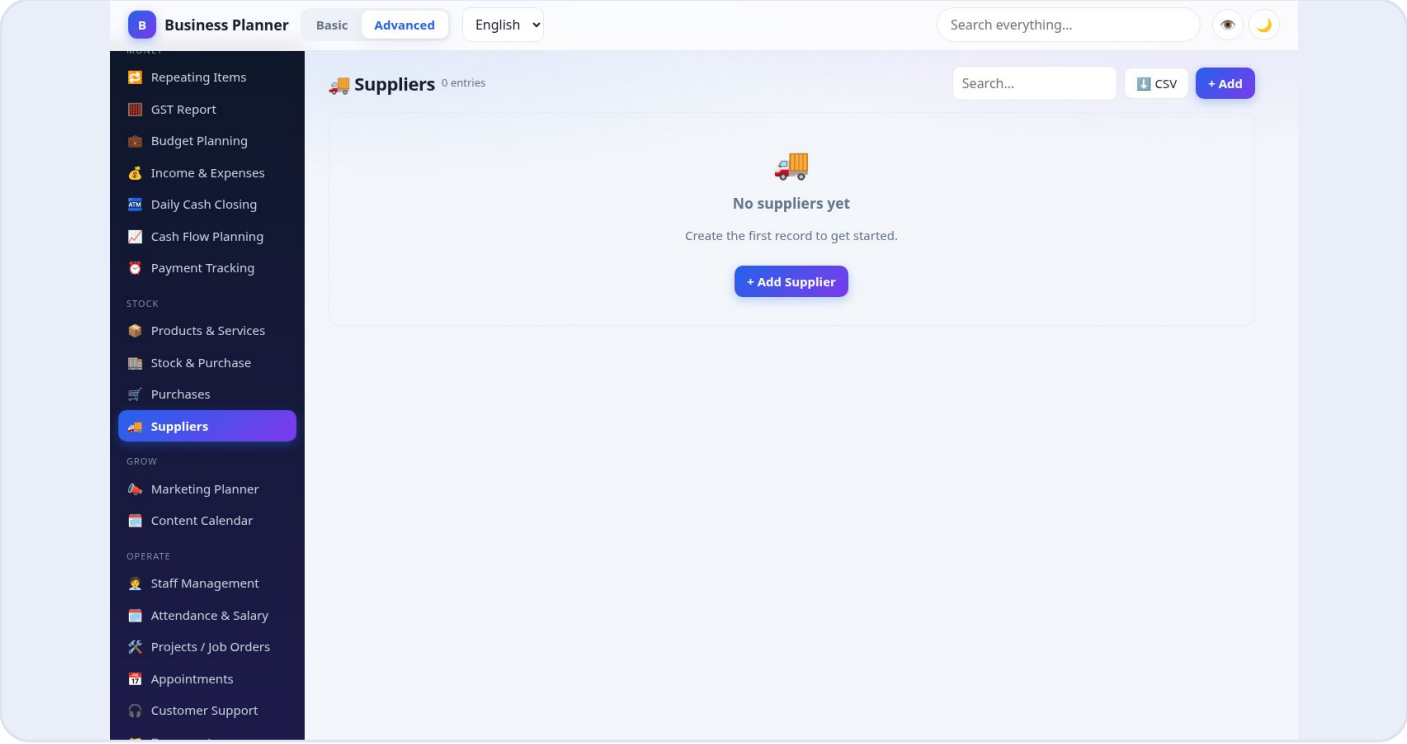

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Back up before a large stock correction.

Suppliers and purchase history

Keep supplier contact, rates, dues and buying history together.

Business Suite screen • shown for guidance

WORKFLOW

1. Create one verified supplier profile.
2. Record supplied items, normal rates and last purchase.
3. Track due amount and pay-by date.
4. Connect purchases to the correct supplier.
5. Review delivery, quality and price before repeat orders.

BEST FOR

Purchasing staff, owners and stock managers

RESULT

More controlled purchasing

APPLY NOW

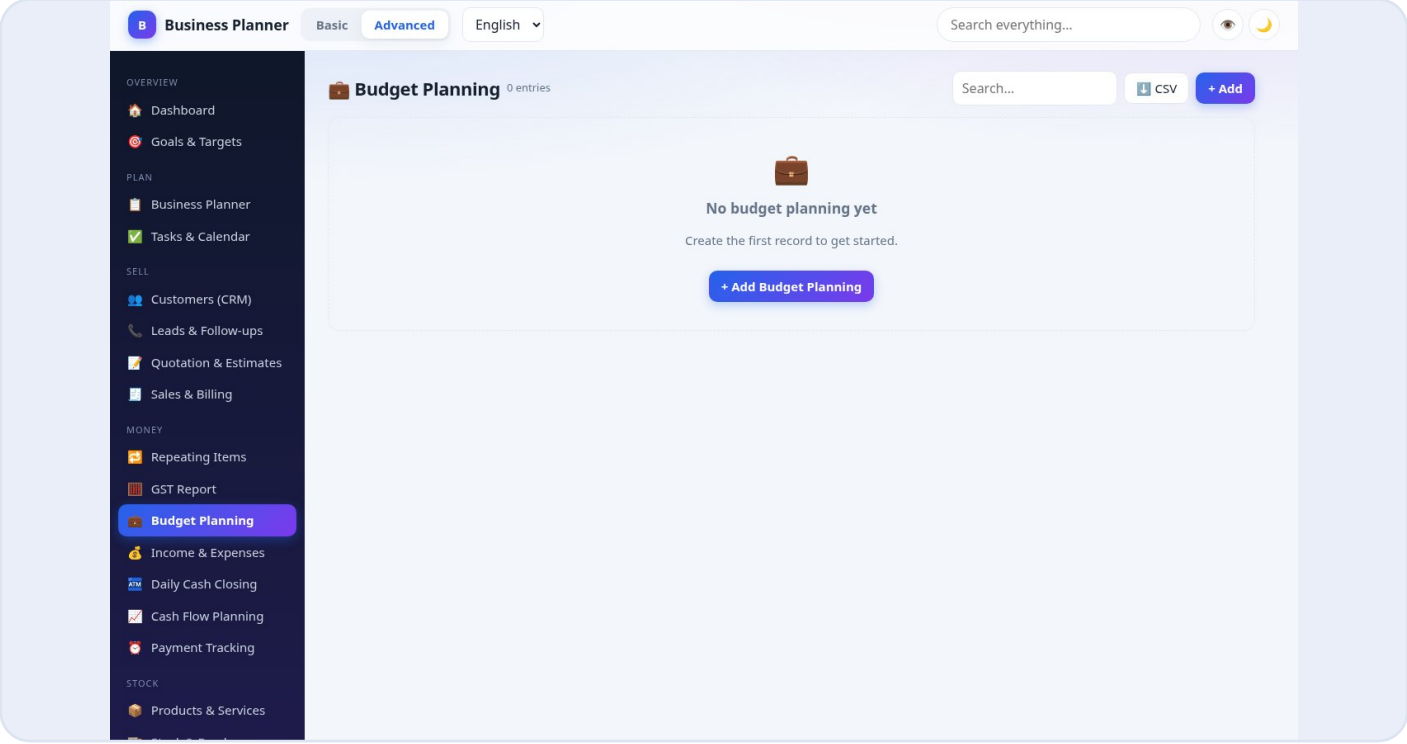

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Keep customer and supplier records separate.

Budget and cash-flow planning

Compare planned spending and expected cash with actual results.

Business Suite screen • shown for guidance

WORKFLOW

1. Set a monthly budget for each meaningful category.
2. Add expected cash-in and cash-out dates.
3. Review actual spending against budget.
4. Investigate large differences and timing gaps.
5. Keep historical budgets instead of rewriting them.

BEST FOR

Owners and finance managers

RESULT

Earlier warning of cash pressure

APPLY NOW

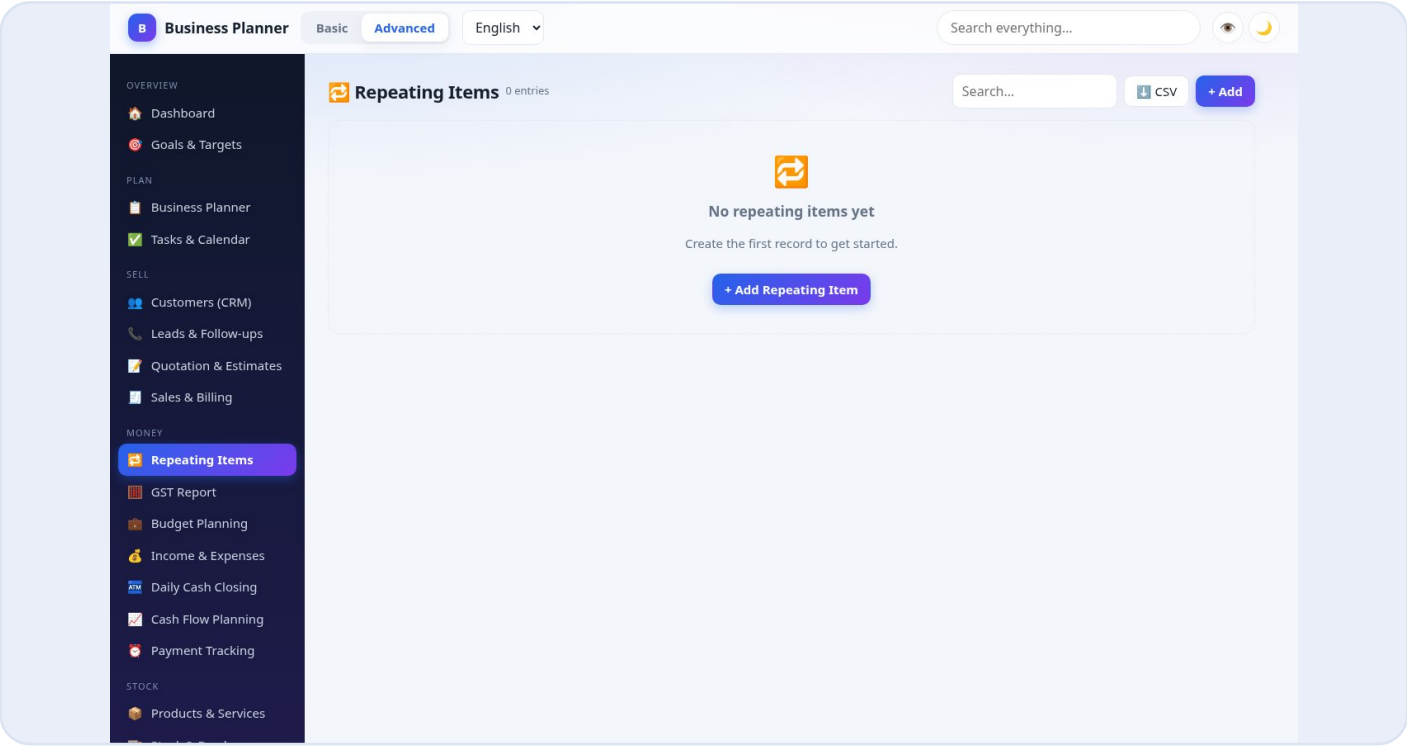

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

A budget supports decisions; it does not guarantee income.

Repeating items and GST review

Control regular commitments and review tax-related totals from source records.

Business Suite screen • shown for guidance

WORKFLOW

1. Create rent, salary, EMI or repeat income with a due day.
2. Set period, category, amount and active status.
3. Generate or confirm each real occurrence.
4. Use GST Report to review sales and purchase tax figures.
5. Reconcile formal filings with professional advice.

BEST FOR

Businesses with regular payments or tax review

RESULT

Fewer missed recurring obligations

APPLY NOW

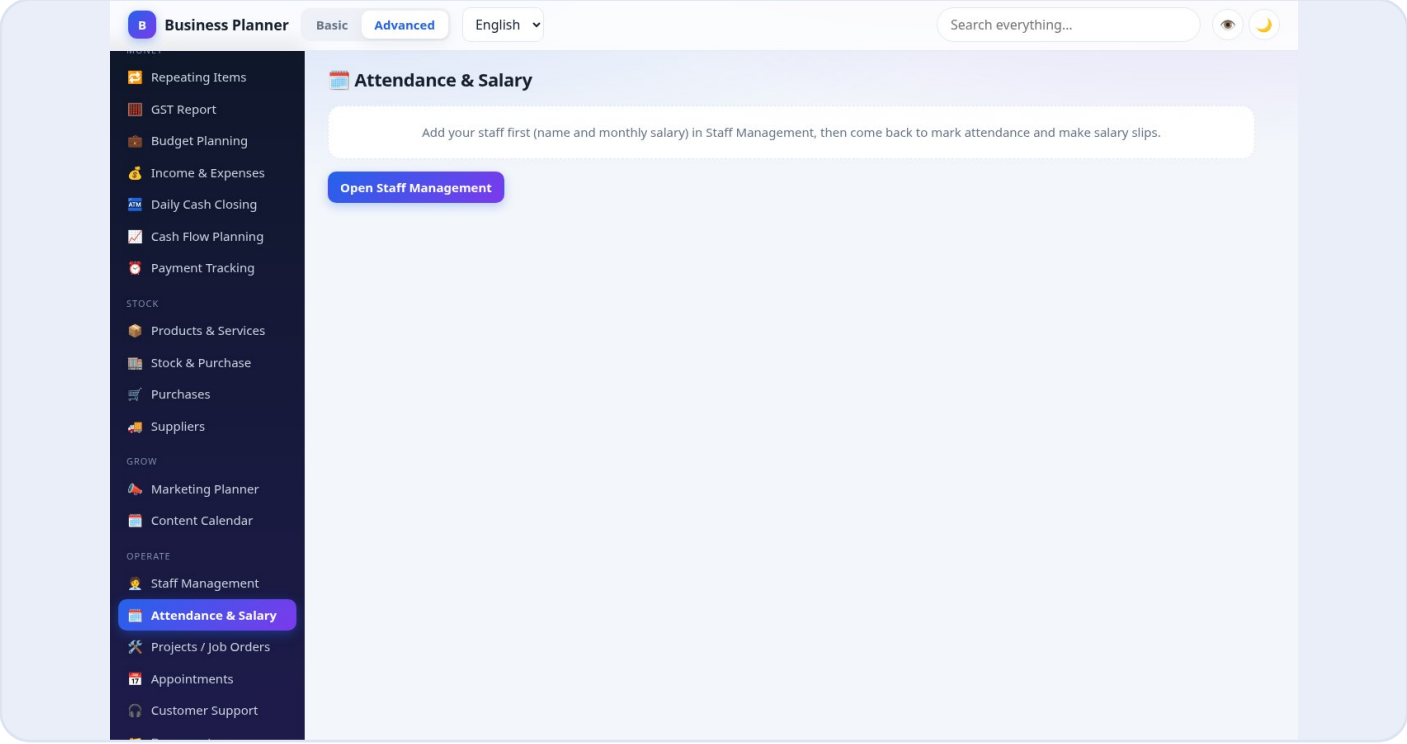

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Business Suite does not replace statutory advice.

Staff, attendance and salary

Organise people records, presence and salary information with controlled access.

Business Suite screen • shown for guidance

WORKFLOW

1. Create accurate staff profiles and roles.
2. Record attendance under company policy.
3. Review salary calculations before approval.
4. Restrict sensitive employee information.
5. Back up before bulk changes or period closing.

BEST FOR

Businesses with employees or regular workers

RESULT

Clearer staff administration

APPLY NOW

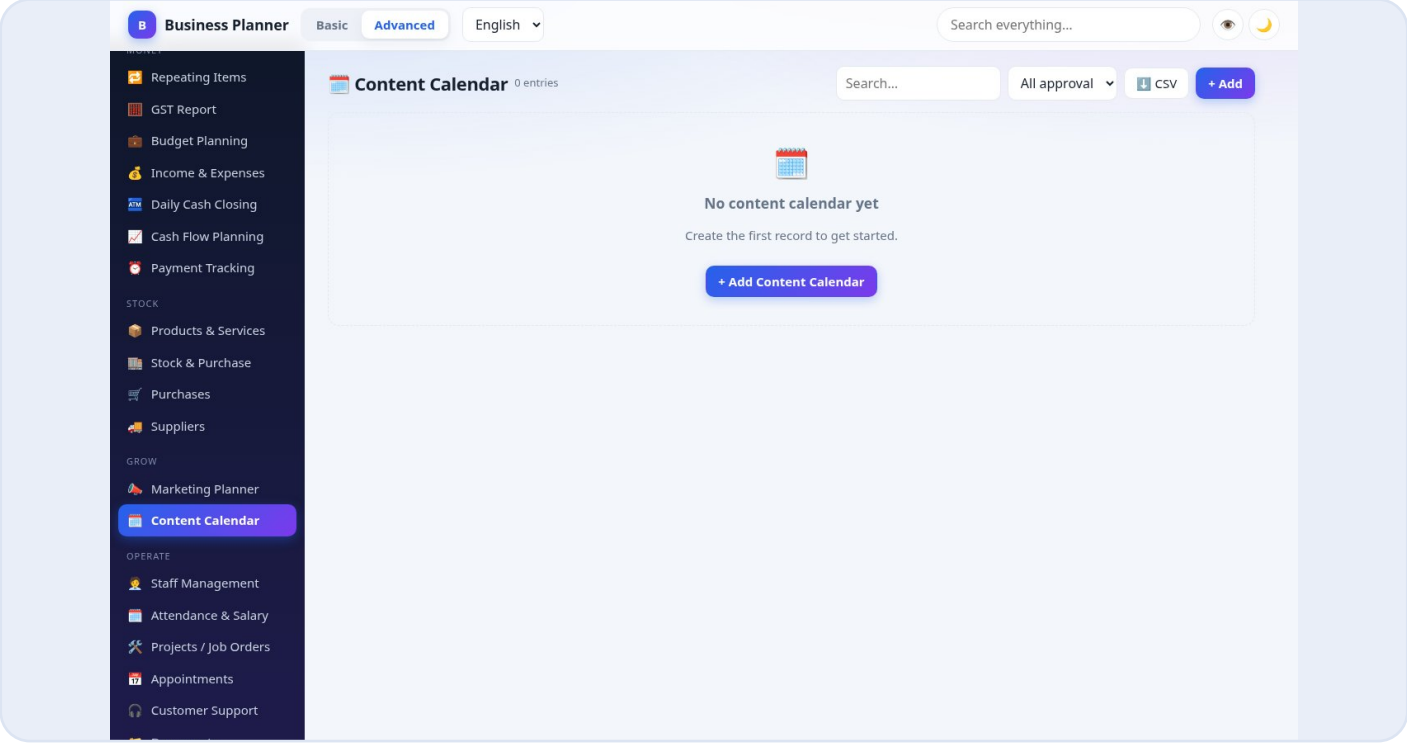

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Collect only employee information the business needs.

Marketing, content and growth planning

Connect campaigns and content activity with enquiries and sales results.

Business Suite screen • shown for guidance

WORKFLOW

1. Define campaign audience, budget, dates and status.
2. Schedule content by platform and publish date.
3. Record enquiries and sales results.
4. Compare campaign spending with outcomes.
5. Turn the lesson into the next growth action.

BEST FOR

Owners, marketing teams and agencies

RESULT

Marketing linked to business results

APPLY NOW

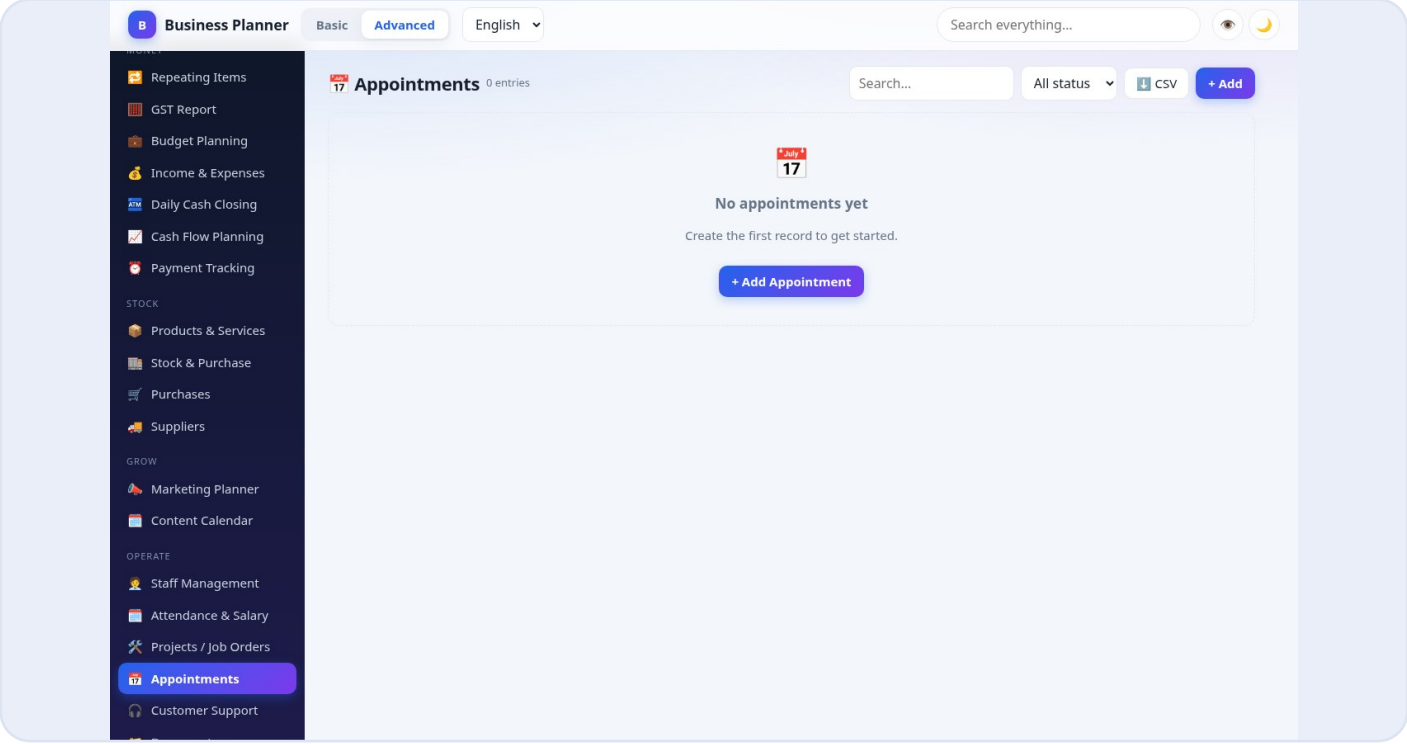

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Measure useful outcomes, not only views or likes.

Projects, appointments, support and documents

Keep planned work, customer contact and supporting files visible.

Business Suite screen • shown for guidance

WORKFLOW

1. Create projects or job orders with owner and deadline.
2. Schedule appointments with customer and purpose.
3. Record support requests and resolution.
4. Store document references in the correct module.
5. Review open items before taking new commitments.

BEST FOR

Project, service and customer-support teams

RESULT

Fewer missed jobs and appointments

APPLY NOW

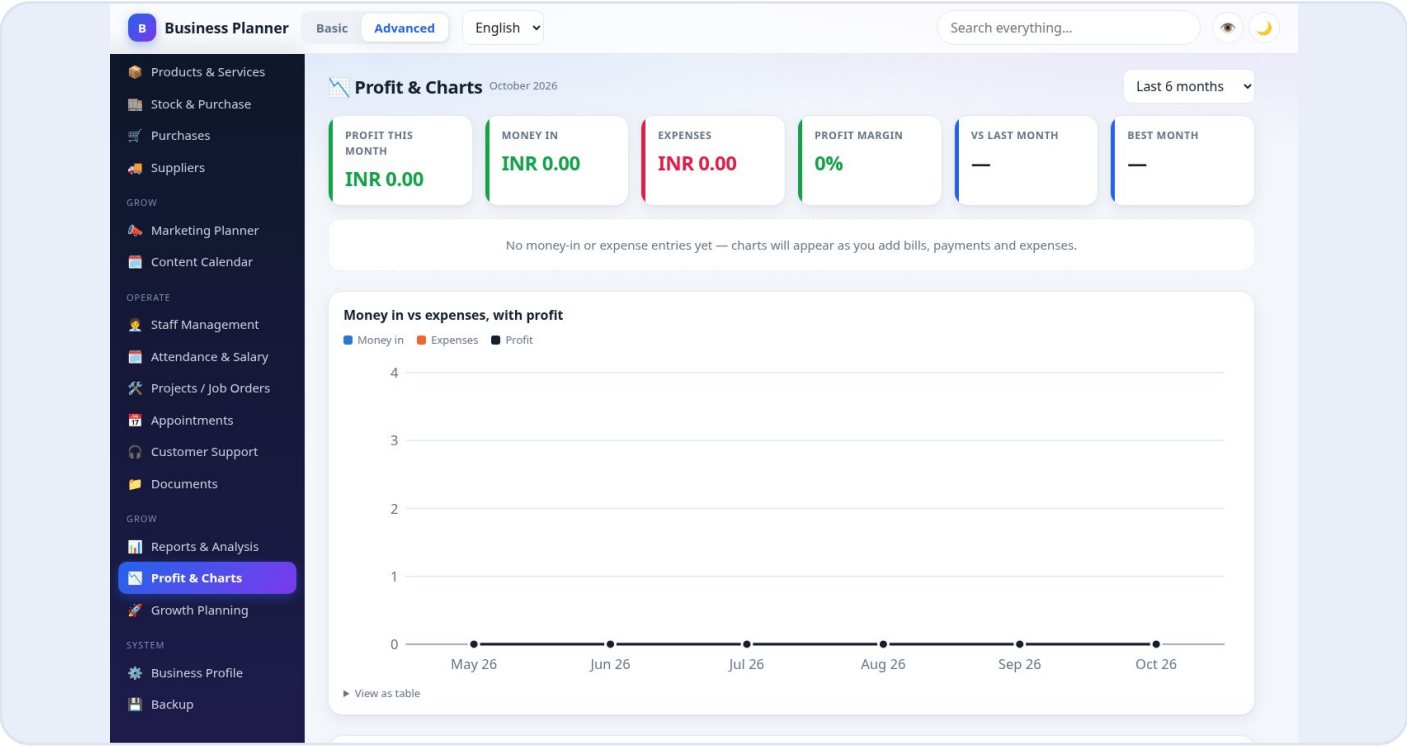

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Use the correct module so search and reports remain useful.

Reports, profit and charts

Turn entered records into questions, comparisons and decisions.

Business Suite screen • shown for guidance

WORKFLOW

1. Choose the correct date range and filters.
2. Check sales, receipts, expenses and outstanding payments.
3. Review profit only after records are complete.
4. Open unusual totals and verify source transactions.
5. Export PDF for reading or CSV for analysis.

BEST FOR

Owners, managers and accountants

RESULT

Decisions supported by traceable records

APPLY NOW

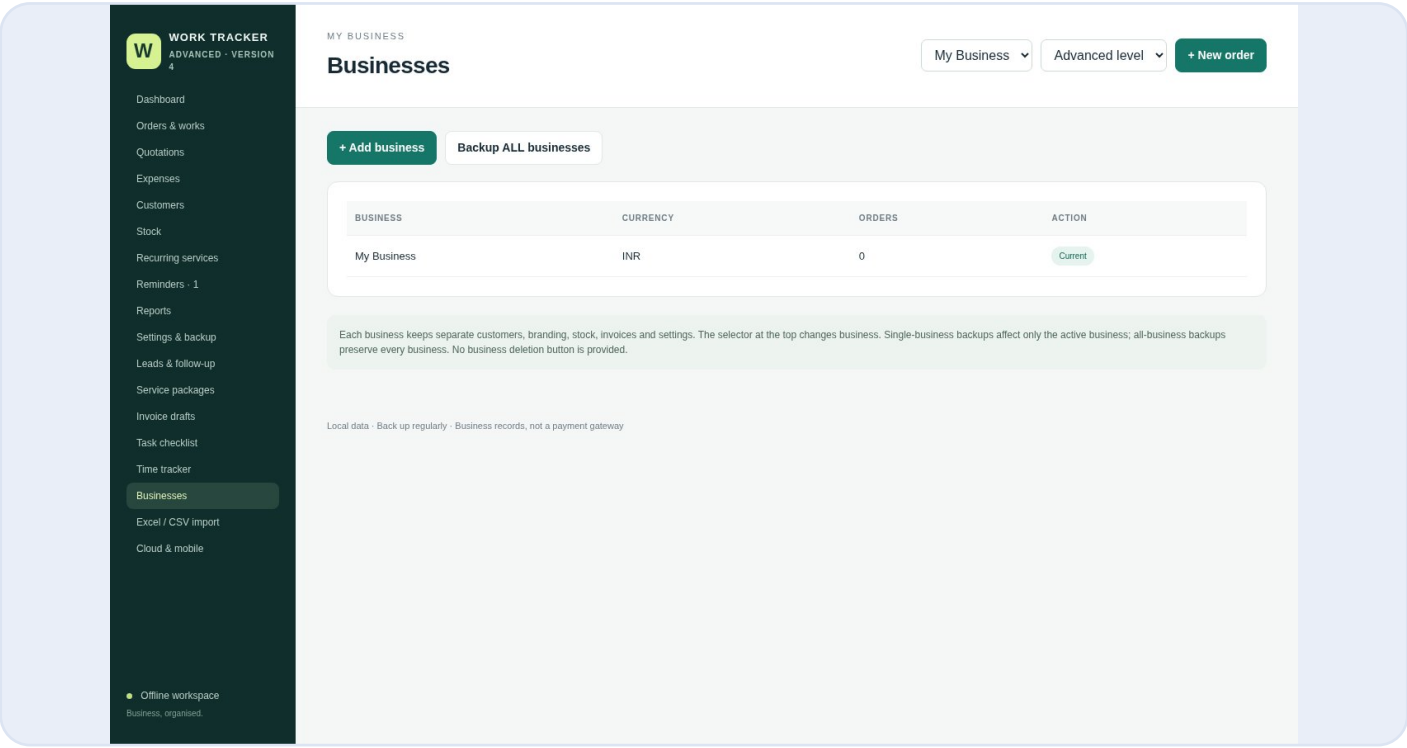

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Compare like-for-like periods in the same currency.

Work Tracker dashboard

See jobs, sales, expenses, pending payments, stock and reminders together.

Business Suite screen • shown for guidance

WORKFLOW

1. Choose the correct business and reporting period.
2. Review current orders, low stock and reminders.
3. Check sales, expenses, profit and cash received separately.
4. Open recent orders when a total needs explanation.
5. Download backups from Settings & backup.

BEST FOR

Job-based businesses and operational managers

RESULT

A current view of work in progress

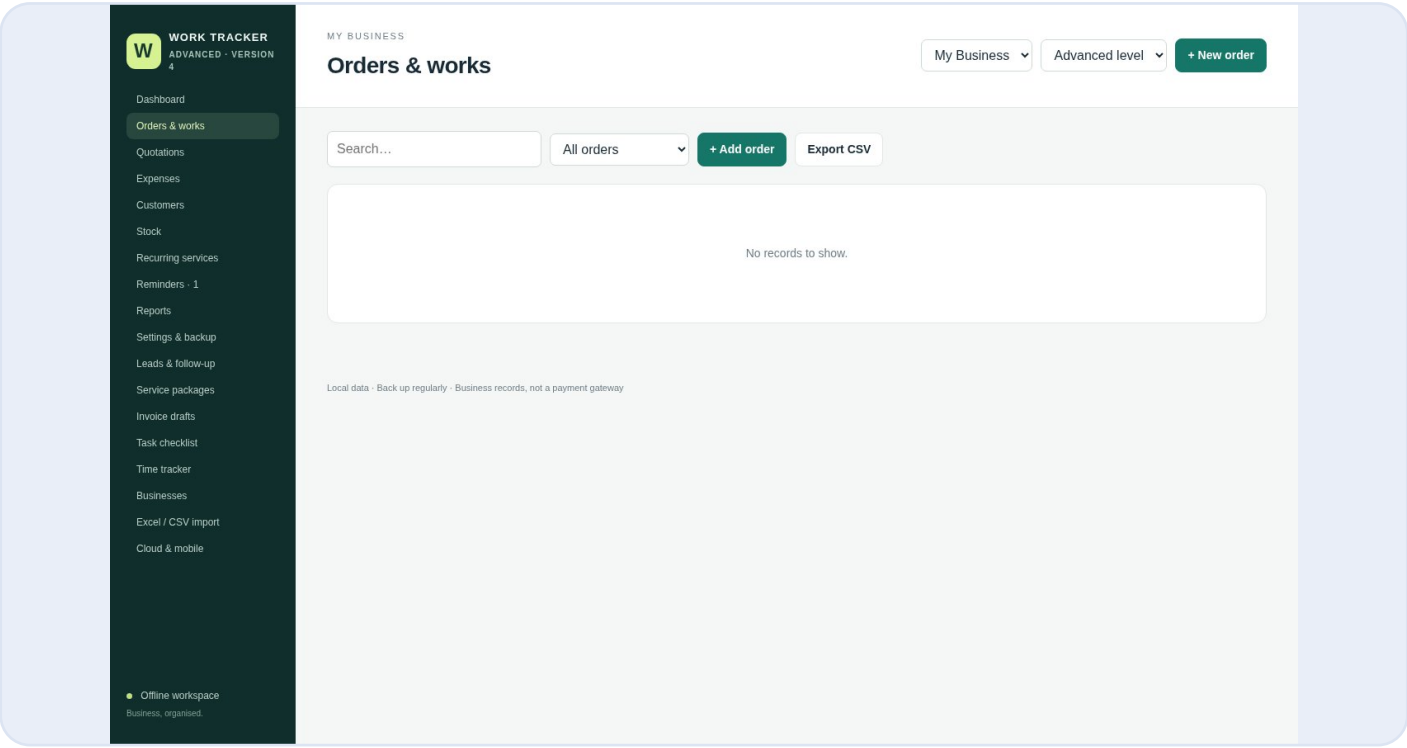

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Work Tracker is not a payment gateway.

Move a customer requirement from quotation to job and final document.

Business Suite screen • shown for guidance

WORKFLOW

1. Create or select the customer before quotation.
2. Describe work, items, quantity, price and expected date.
3. Convert an accepted quotation into an order.
4. Update status as the job moves through the team.
5. Close after delivery, payment and details are checked.

BEST FOR

Workshops, service centres, agencies and contractors

RESULT

A traceable customer job lifecycle

APPLY NOW

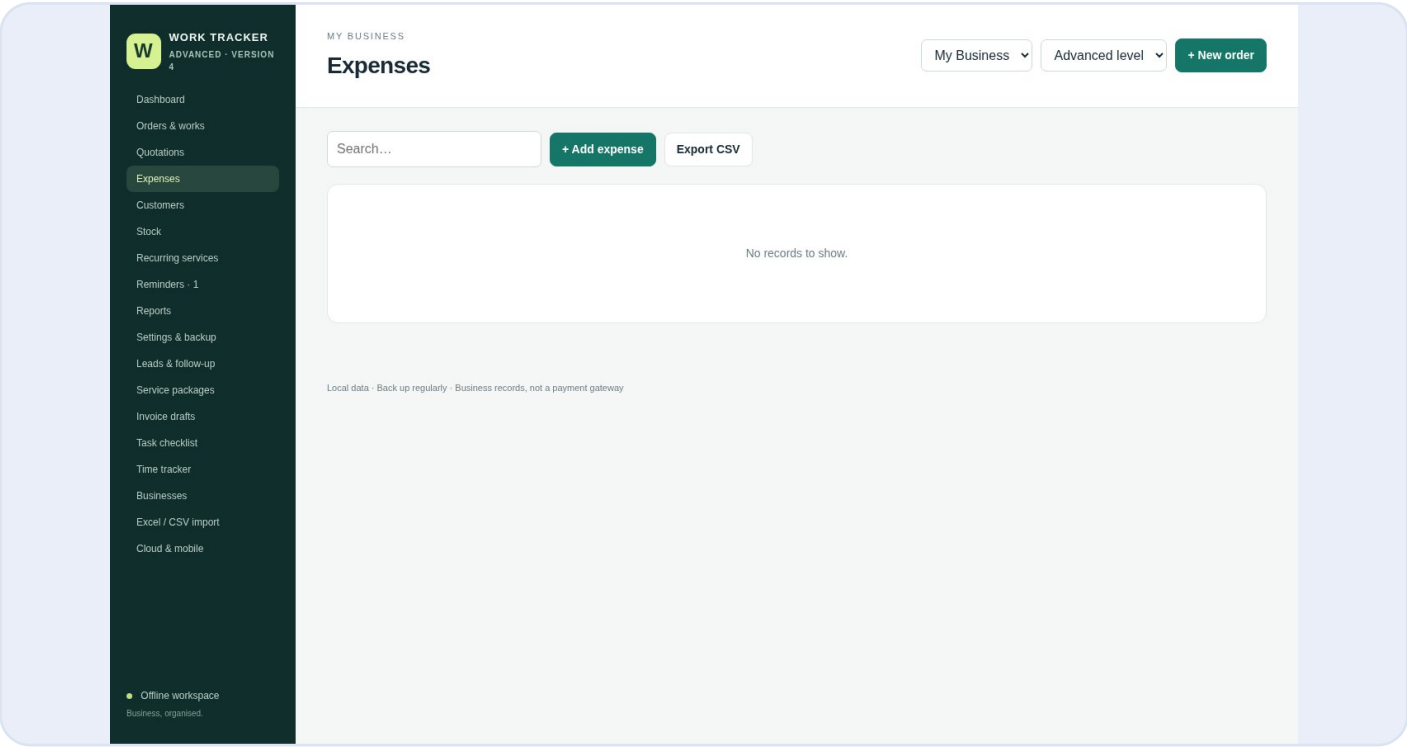

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Record approved changes instead of overwriting the promise.

Payments, returns, refunds and expenses

Keep adjustments explainable after the original order is created.

Business Suite screen • shown for guidance

WORKFLOW

1. Record each payment against the correct order.
2. Use returns for quantity or item credits.
3. Record cash refunds with date and method.
4. Capture operational expenses in the right category.
5. Review order balance and reports after adjustments.

BEST FOR

Accounts staff and job managers

RESULT

Balances that can be explained

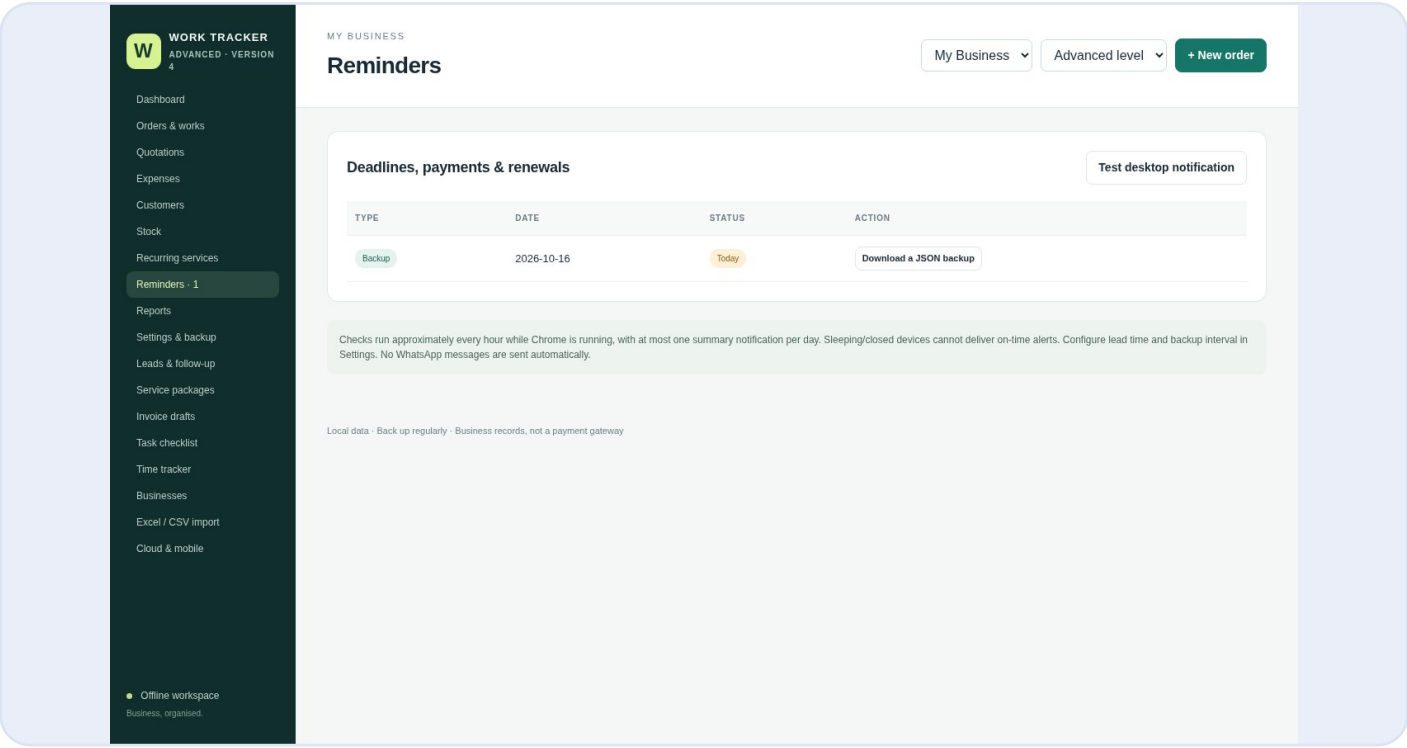

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Do not delete a valid transaction merely to change balance.

Connect customer history with materials, renewals and promised dates.

Business Suite screen • shown for guidance

WORKFLOW

1. Search before creating another customer.
2. Use stock records for products consumed by jobs.
3. Create recurring service renewals with the next date.
4. Review overdue, today and upcoming reminders.
5. Open history before discussing a balance or repeat service.

BEST FOR

After-sales and recurring-service businesses

RESULT

Better customer continuity

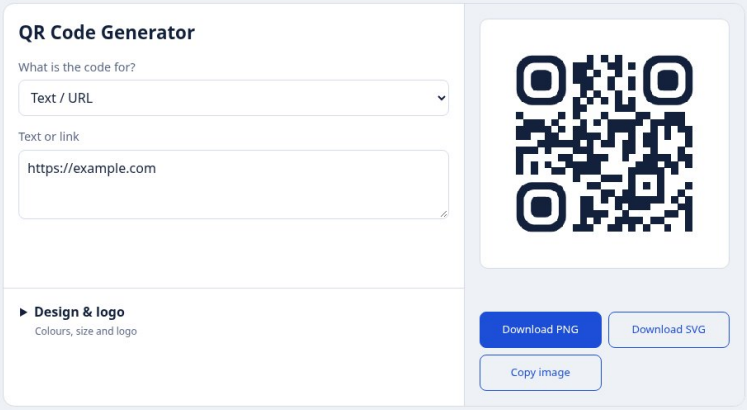

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Large attachments increase storage and backup size.

Create a tested QR code for a business destination or contact action.

Business Suite screen • shown for guidance

WORKFLOW

1. Select QR type and enter the exact value.
2. Choose size, colours and optional logo carefully.
3. Generate and scan with another phone.
4. Download the approved PNG.
5. Retest after changing a linked page or contact.

BEST FOR

Shops, events, marketing and customer service

RESULT

A quick, tested customer action

APPLY NOW

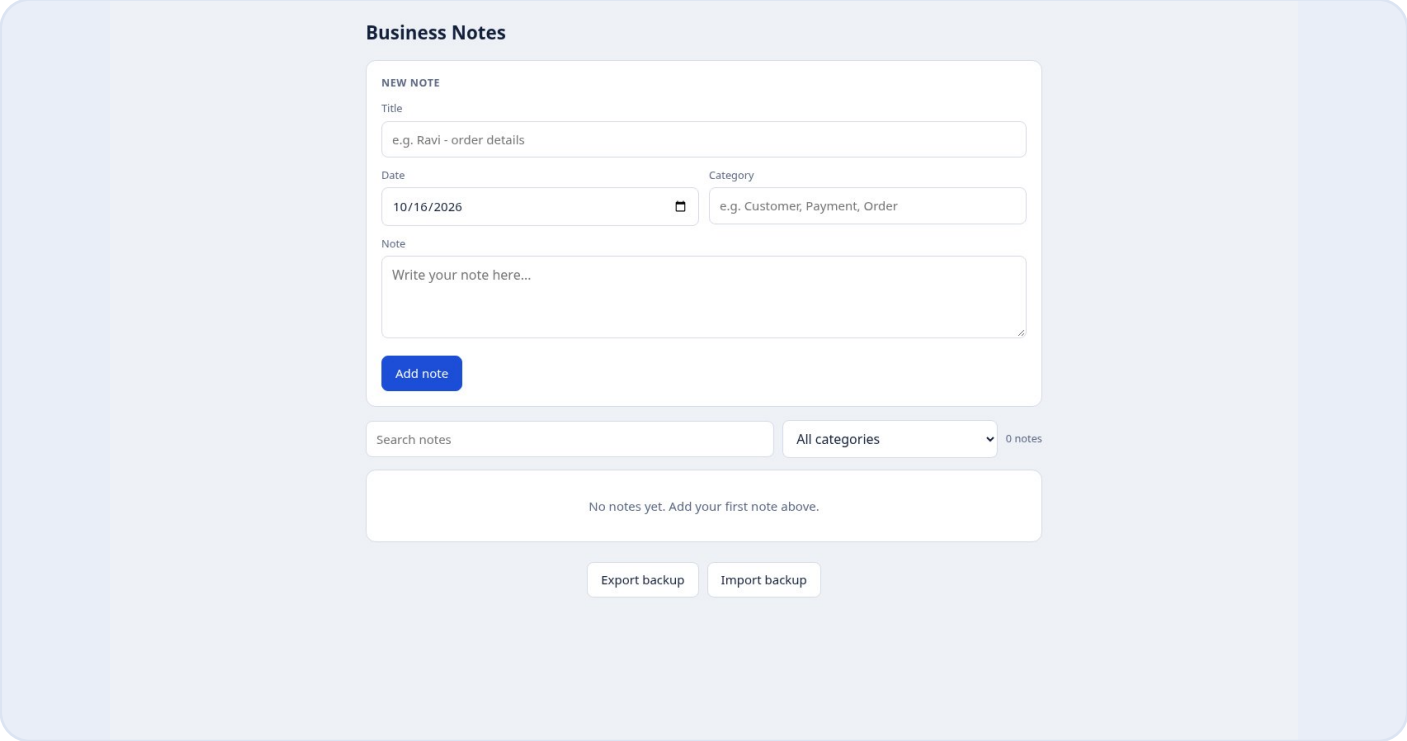

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Never print a QR code before testing it.

Business Notes

Store organised working notes and convert action items into tasks.

Business Suite screen • shown for guidance

WORKFLOW

1. Use a specific title and one subject per note.
2. Select a useful category and write clear details.
3. Search before adding another copy.
4. Export notes with the backup routine.
5. Never save passwords, OTPs or full card details.

BEST FOR

Owners, staff and operational teams

RESULT

Searchable business memory

APPLY NOW

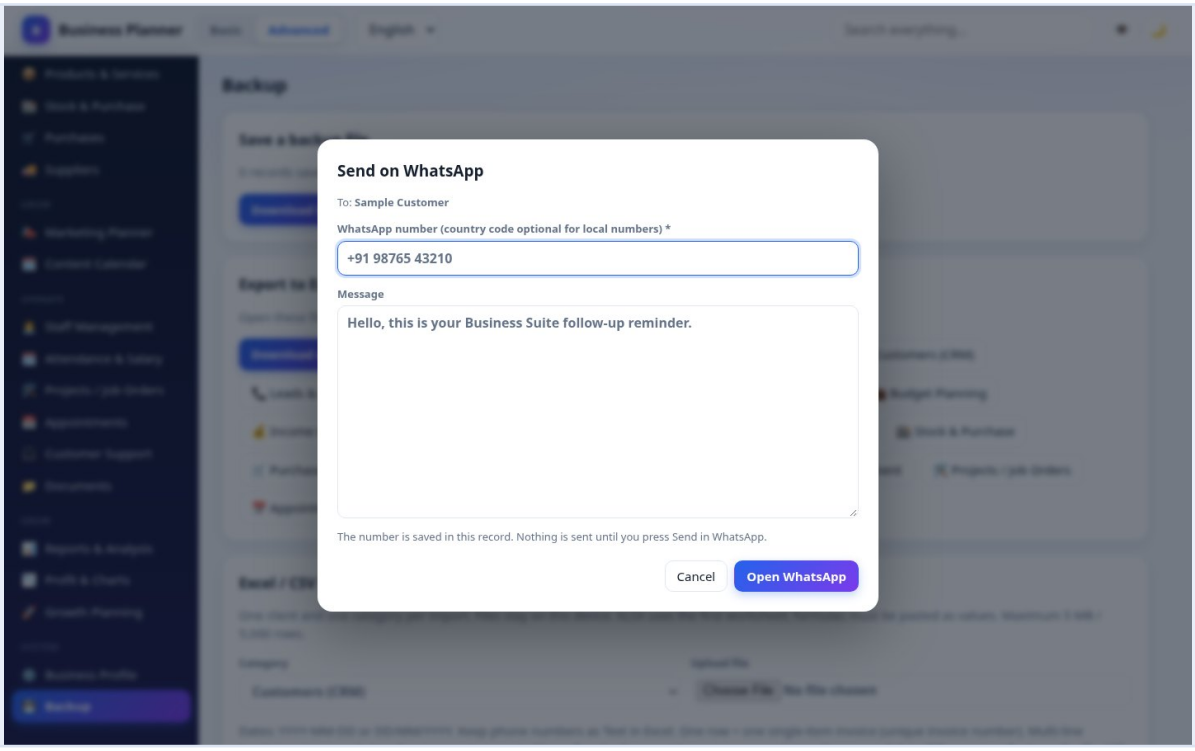

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

A note with a deadline should become a task.

Messages and reminders

Prepare a customer message, verify it and send through WhatsApp.

Business Suite screen • shown for guidance

WORKFLOW

1. Choose customer and confirm the phone number.
2. Review amount, date and reference.
3. Open WhatsApp and verify the recipient again.
4. Press Send yourself after final review.
5. Record the conversation result in the related record.

BEST FOR

Sales, collections and service teams

RESULT

Faster follow-up with human confirmation

APPLY NOW

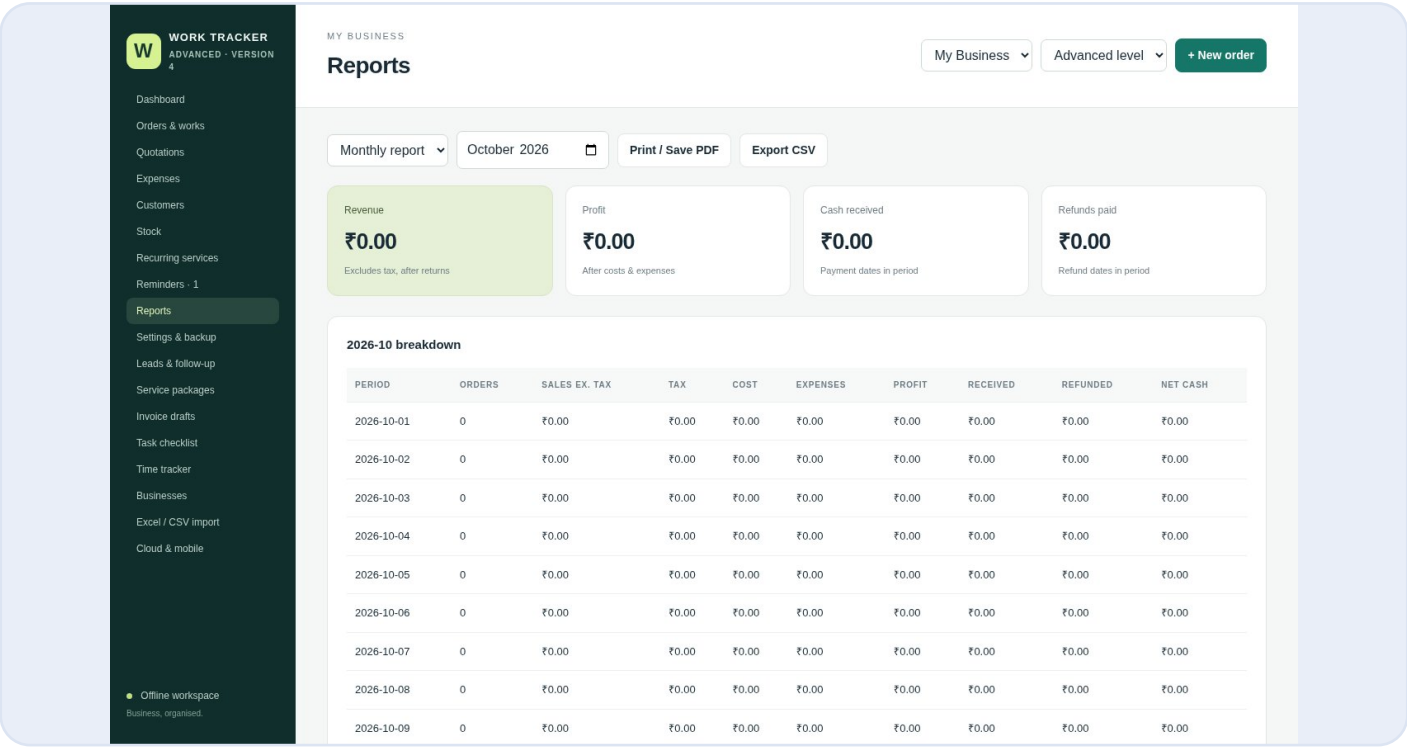

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Business Suite prepares content; the user sends it.

Daily WhatsApp summary

Prepare a concise daily view of sales, receipts, expenses and pending amounts.

Business Suite screen • shown for guidance

WORKFLOW

1. Choose summary time and owner number.
2. Keep the relevant app environment available.
3. Preview the message and verify figures.
4. Open WhatsApp and press Send after checking recipient.
5. Correct missing records and prepare the summary again.

BEST FOR

Owners who review the business remotely

RESULT

One compact end-of-day review

APPLY NOW

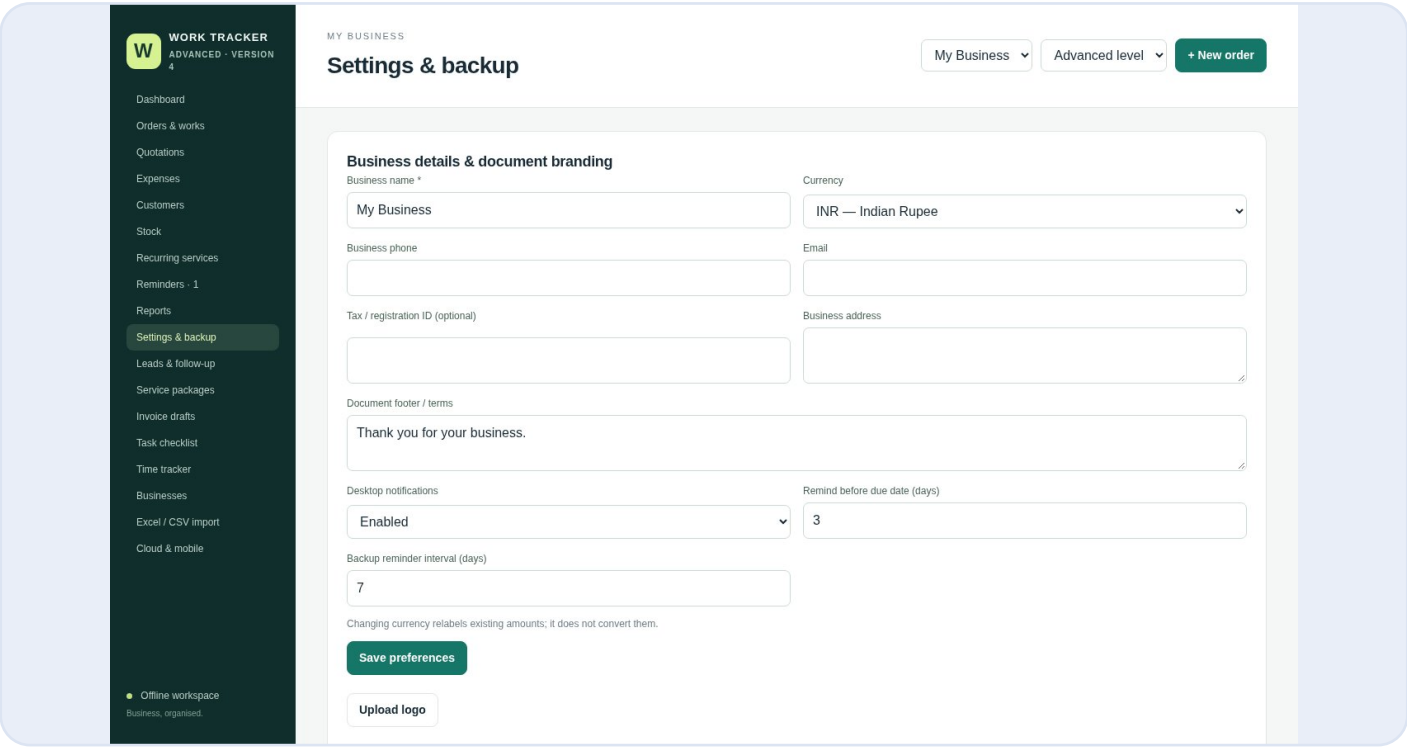

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Verify every prepared summary before sending.

Connect your Google Drive

Connect the Google account that should own the Business Suite cloud folder.

Business Suite screen • shown for guidance

WORKFLOW

1. Open Drive and select Connect Google Drive.
2. Choose the intended Google account.
3. Review and approve access for Business Suite files.
4. Wait for connection and initial sync status.
5. Confirm the Business Suite folder in Google Drive.

BEST FOR

Customers wanting cloud copies and device sharing

RESULT

A visible Business Suite folder in Drive

APPLY NOW

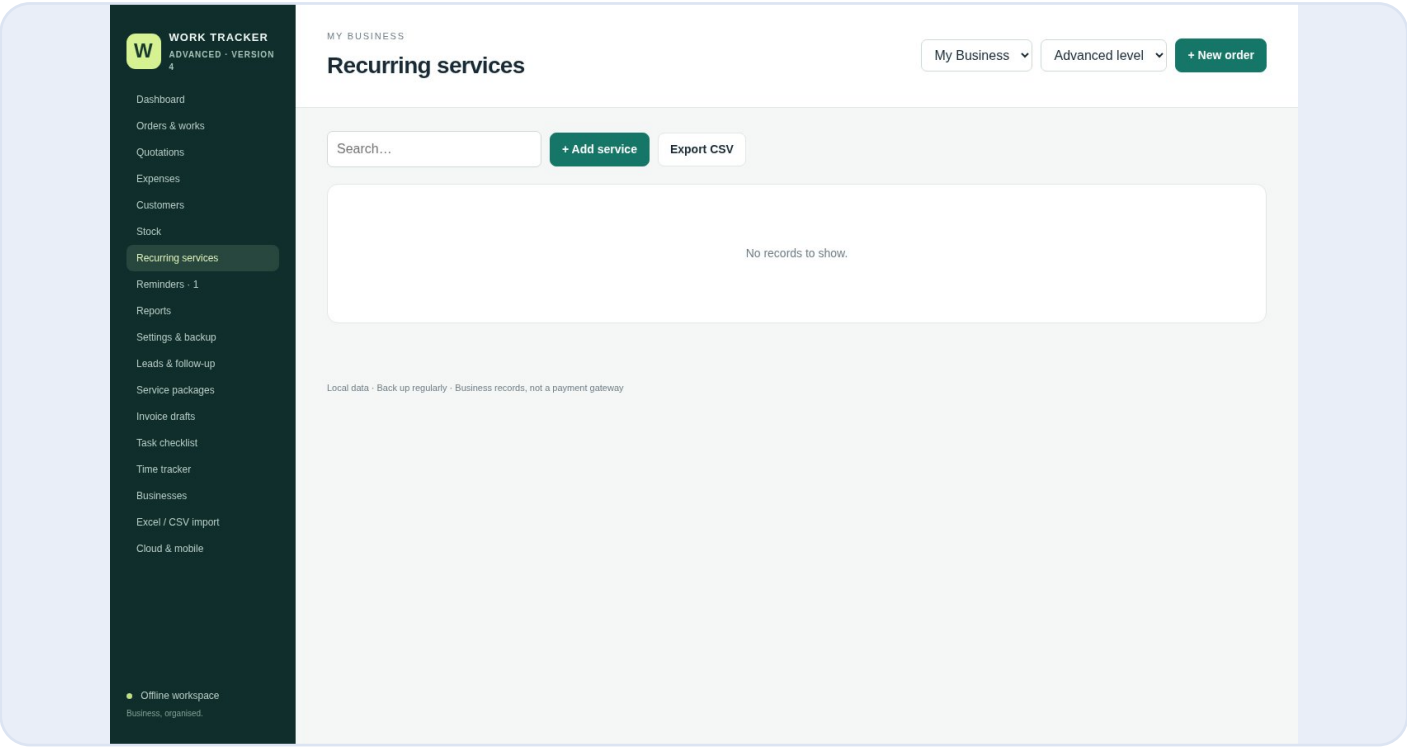

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Google Drive is optional and requires internet.

Use the Business Suite folder across devices

Connect the same intended account and avoid conflicting edits.

Business Suite screen • shown for guidance

WORKFLOW

1. Allow the first device to finish uploading.
2. Connect the same Google account on another supported device.
3. Check latest sync time before editing.
4. Let one device finish before editing elsewhere.
5. Keep an independent local or encrypted backup.

BEST FOR

Customers using more than one supported device

RESULT

Controlled access to current data

APPLY NOW

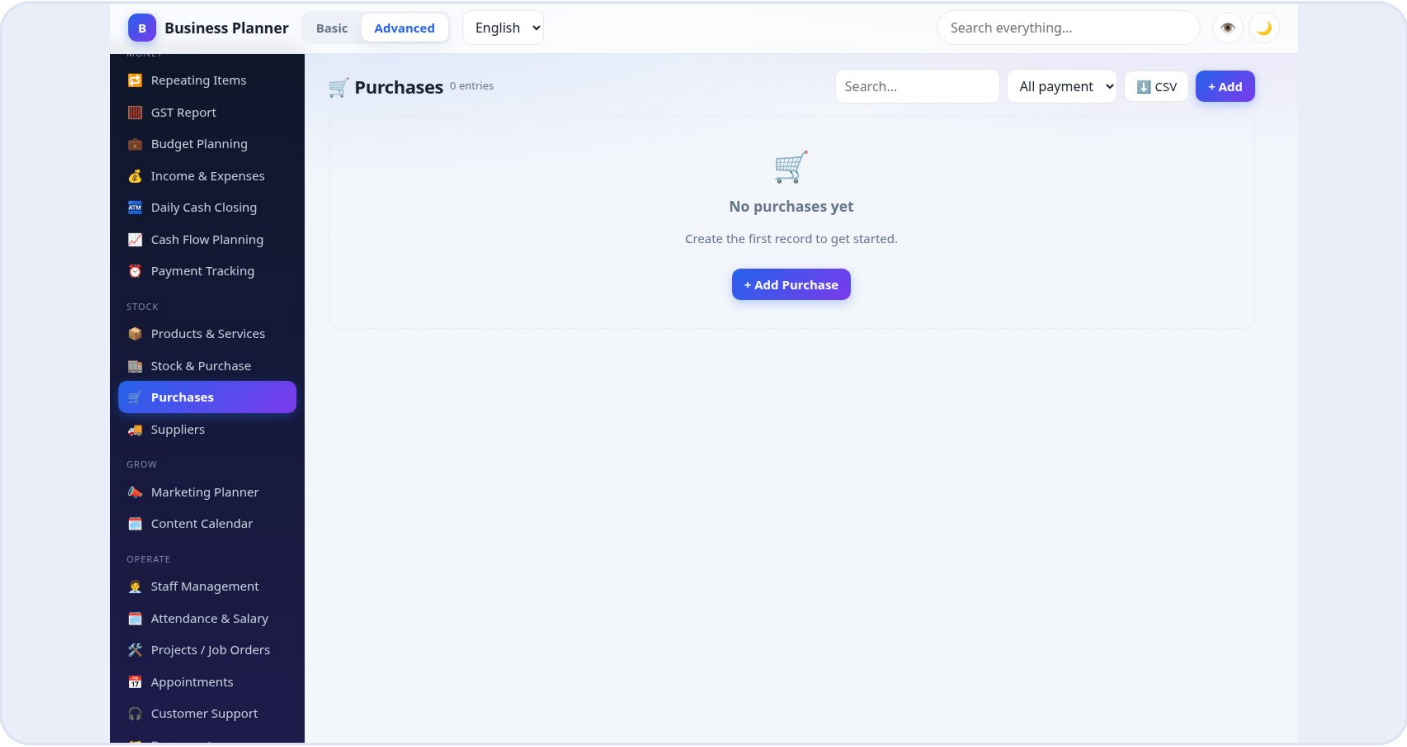

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Each device must satisfy applicable licence rules.

Backup, restore and export

Use the right file for recovery, reading or spreadsheet analysis.

Business Suite screen • shown for guidance

WORKFLOW

1. JSON is the portable full-data backup format.
2. Encrypted backup uses a password you must retain.
3. Preview restore counts; Add to current is safer.
4. PDF is for reading; CSV is for Excel or Sheets.
5. Wait for success before starting another export.

BEST FOR

Every Business Suite customer

RESULT

Recoverable data and usable reports

APPLY NOW

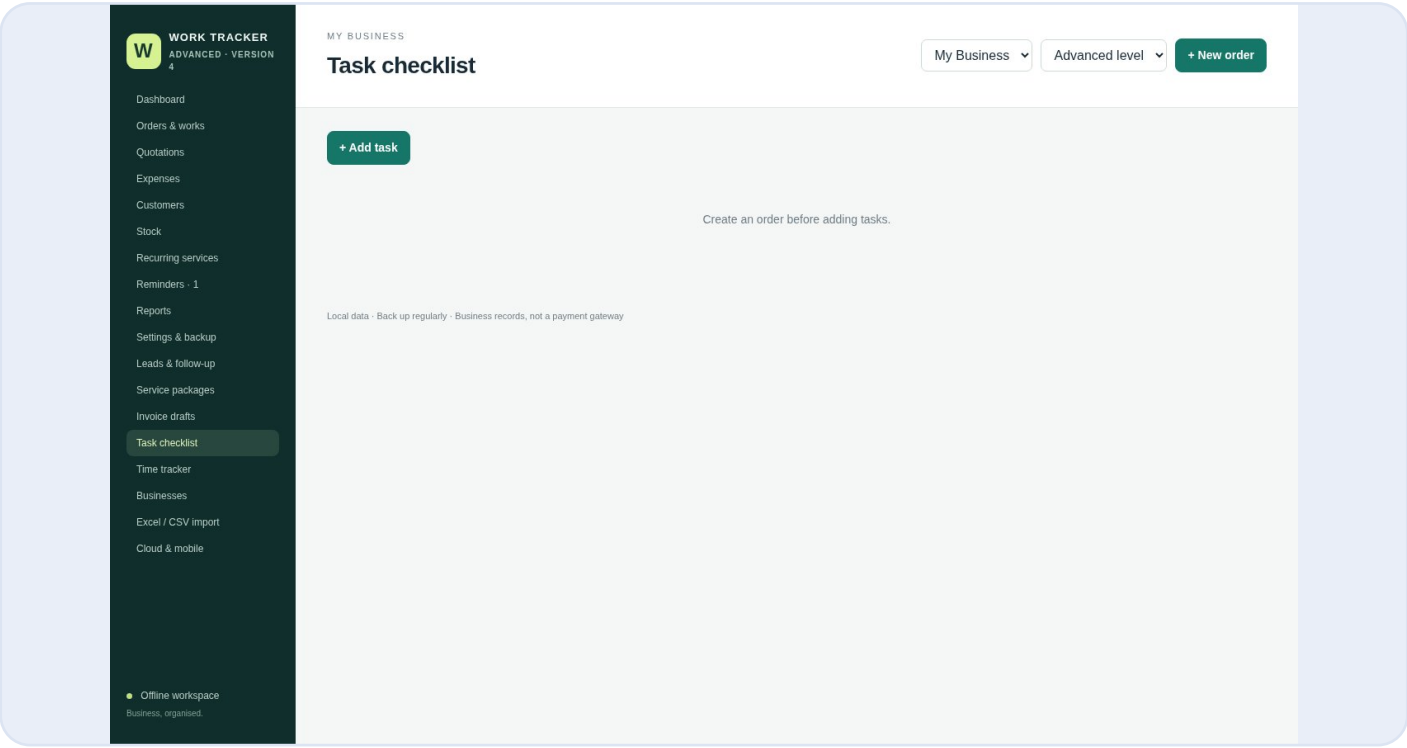

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.

REMEMBER

Use Replace or Start Fresh only with a verified backup.

Troubleshooting, privacy and final checklist

Complete these checks before depending on Business Suite for daily work.

Business Suite screen • shown for guidance

WORKFLOW

1. Blank screen: reopen, update WebView/Chrome, then restart.
2. Stuck download: wait, close, check Downloads and retry.
3. Drive error: use official build, correct account and stable internet.
4. For support, record device, version, action, time and screenshot.
5. Final: licence, profile, PDF/CSV, Drive and restore all tested.

BEST FOR

All customers and support staff

RESULT

A verified ready-to-use system

APPLY NOW

Open this screen, complete one safe test entry, reopen it and confirm the saved result before using live business data.
